Thread: [Official Gaming Group - Skill - Recruitment #3](#)

Sir - March 22, 2017, 7:07 pm

Recruitment Thread

Skill is a group dedicated to gaming, be it casually or competitive, on a Sega Dreamcast or high end PC. We simply love to game. Our subforum consists of everything gaming, from discussions to group gaming nights and more. The group will have game-nights, tournaments, streams and more. We look forward to seeing a lot of true gamers join us on this journey.

Requirements:

- Must be a member for at least 1 month.
- Positive Reputation.
- Warning Level of 40% or lower.

Userbar

In this third recruitment, we are accepting both competitive and casual players. We are also looking for some mobile gamers as well (yes you guys are important too <3.) Don't forget to mention anything that could be beneficial towards the group.

Please fill out the form listed in the code:

```
Code [color=#FFFFFF][b]Gaming Platform(s):[/b][/color]

Gaming Platform(s): PC

Region: EU

Tell us a little about yourself: I am a hardcore gamer since I have been a young kiddo.

Current Favorite Games: H1Z1, Black Desert Online, Overwatch, CS:GO, FIFA 17, Rocket League

Throwback Favorite Games: My favorite throwback game is definitely Counter Strike 1.6! I loved that game and played it every single day of my childhood.

What can you bring to Skill? A great teamplayer, and an active gamer.

Any experience streaming/video editing/competitive play? I have been messing around with it for a bit, so I know how to do it, but I do not do it actively. I used to play competitively in CS games, but haven't had the time in the last couple of years due to work and my studies.

Gaming Platform(s): Xbox One, PC, PS3

Region: NA

Tell us a little about yourself: Well, I'm 19 years old, been playing games since I was really young. Started out on an IBM laptop playing games like Wizard101, shit like that was my childhood. We had the old green xbox as well, played racing games on that, even had the wheel and the pedals. Eventually as time moved on I got better computers. Got a MacBook Air a couple Christmases ago and used that for games like WoW, League of Legends, CSGO. Was hard to run but it sufficed for the time being. I finally got a new beast PC a year ago, able to play all my games now at really high frames. I enjoy both PC and Console and play games like Halo 5, Halo MCC, and the entire Gears of War series on the Xbox. I have a huge passion for gaming and plan on getting partnered on Twitch eventually. I stream quite often to a low audience but plan on making it bigger as time goes by.

Current Favorite Games:

Xbox: Halo 5, Halo 3, MCC, Entire Gears of War Series.

PC: H1Z1(Plat), Overwatch(Masters) League of Legends(Highest D2 in Season 3). World of Warcraft(Every class 110 860ILVL+ except Shaman. CS:GO, Wizard101, Fallout series, Mass Effect, Rocket League.

PS3: GTA V, Need for Speed.

Throwback Favorite Games: Definitely Wizard101, still have a 09 account till this day. Met a lot of people on it, made some friends when I was a kid, was a really fun game and I loved it. Helped me cope with other shit going on. Also gotta shoutout Halo 3. Was a 4 Star General, 50 in Lone Wolves, 50 in Team Doubles and Snipers, really miss the game and still am really sad it's dying. Was the best halo that ever and will exist.

What can you bring to Skill? Definitely can bring a fun character/personality, an active gamer, very social, love to play with others and share what I know with them. Don't care for other peoples ranks, I'm always glad to play and have fun on any system!

Any experience streaming/video editing/competitive play? I used to have a 2.5k+ follower Twitch stream, had around 30-70 viewers depending on the game I was playing. I loved streaming but quit because my computer could barely handle it, now since I'm upgraded I'm streaming once again! As far as video editing goes, I don't have much experience in that field, except very basic work. For competitive play, in League of Legends I was on a tournament team called Vici. We would party as 5 in tournaments for RP and usually come out first or second. All of us were in Diamond except the jungle who was masters. In World of Warcraft, I'm very good at PvP. My highest rating was 2.3k in 2's on my WW Monk & Frost Mage. I raid competitively as well, currently getting into Mythic Nighthold and preparing for Tomb of Sargeras. In CSGO my highest rank was LEM. I quit because all my friends stoped playing and we just played for fun. In Overwatch I'm ranked Masters with my highest peaking 3.6k.

Thanks for giving me the opportunity to apply and I wish everyone best of luck getting in!

Gaming Platform(s): Mainly PC but I own an Xbox One.

Region: North America

Tell us a little about yourself: I have been playing games ever since I remember and I have been in quite a few gaming groups on here starting with the original Gamers. I have been more casual lately while I've been busy but I will soon be relieved of stress and be able to play a lot more.

Current Favorite Games:

Town of Salem

League of Legends

CS:GO

Throwback Favorite Games: I'm not sure if Halo is old enough, but that's the game I always think

about when I throwback to the good old days. Besides that I still enjoy playing Pokemon games and other old school on Emulators from time to time and like playing old Fallout games.

What can you bring to Skill? I can bring my knowledge of League of Legends, and I can be a fun person to play games with.

<https://hackforums.net/showthread.php?tid=5425974>

<https://hackforums.net/showthread.php?tid=5473822>

Any experience streaming/video editing/competitive play? I have been on some competitive teams in League of Legends, but never really got far. Same with CSGO, I used to dominate FaceIT with my friends but the team broke apart after a few months. I streamed League a few times for friends, but obviously never had a high viewer count.

Gaming Platform(s): PC and PS4

Region: USA (Eastern)

Tell us a little about yourself: I'm 16 years old and spend just about all of my free-time gaming. I've been into video games since I was around 6 or so when my older brother got COD 4 for Christmas. I was obviously shit back then, but by the time WoW came out I was playing more than he was and I was 7 years old lol.

Current Favorite Games: Spending hours a day on Rust and CS:GO as of now. PS4 I'm more casual with COD and sports games.

Throwback Favorite Games: Depends. Throwback as in 5-10 years ago, obviously the old CODs! MW2 was insanely great fun for myself. Otherwise, my neighbor had a nintendo 64 and I'd go over everyday back then and place some Pokemon shit. Don't even know what it was, just remember tons of minigames LOL.

What can you bring to Skill? I'd love to meet new people to play with and make some cool friends. I'd plan on hosting some tournaments. I have experience in running servers for a few games, and believe I could do that for Skill as well! Would be fun to have our own private little gameservers (Rust, Minecraft, even CS:GO etc).

Any experience streaming/video editing/competitive play? I know my way around Sony Vegas and have attempted to stream in the past. I actually planned on trying something out tomorrow (Rust servers wipe tomorrow aka fresh start) with recording and possibly starting something with YouTube as an extra hobby!

Tell us a little about yourself: Chill, Laid back player yet i'm some what of a try hard. I like to have fun but at the same time win if you get what I mean. I've played games through out my life.

Current Favorite Games: WoW & OW

Throwback Favorite Games: Maplestory, Soldierfront, & KH2

What can you bring to Skill? Just your casual gamer that can help another member in the guild with whatever game he's playing that I have knowledge to.

Any experience streaming/video editing/competitive play?

Streaming, a bit. I used to stream to 100+ viewers back in GTA. gave up not sure why and comp of course. I'm a competitive player I strive to be the best and learn a few things that can help me out in the game and I'd be glad to help other people with some tips of a game that I know somewhat

Gaming Platform(s): Ps4, iPhone(If you want to count it), and PC/laptop

Region: UK

Tell us a little about yourself: I'm 19 years old, and hopefully about to continue studying computing again in college(I'm off just now, I left for a year). I just lost my job so I have a decent amount of time for gaming right now, although this could change in the near future. I've been an avid gamer since I was probably 6 years old. I'm a fairly relaxed person, although when competition is involved I can get annoyed quickly. I mostly play games casually.

Current Favorite Games: Minecraft (don't call me a fag), Rust and Call of Duty MWR.

Throwback Favorite Games: Mario Kart 64, Freelancer (PC), Command and Conquer, Half Life. Many more.

What can you bring to Skill? I'm not entirely sure what I could bring to be honest, I'll be as active as I can possibly be and will do my best to help and keep the group high quality.

Any experience streaming/video editing/competitive play?: I used to play Call of Duty MLG when it was popular in Mw2, and I also played a bit of CoD Ghosts too. I have alright experience in video editing(It was part of my college course) although I haven't made a YouTube video in years. I have no experience in streaming.

Thank you for considering my application, good luck to everyone else ?

Gaming Platform(s): PC, Xbox 360, Android

Region: North America

Tell us a little about yourself: Well my name is Zach, i'm 17 turning 18 in a month. I like to game and skateboard in my free time. I've been into gaming ever since I was a little kid, my first ever games were Toy Story 2 and Madden 99 on the N64. I got my first PS2 when I was 5, along with NFL Blitz 2003 which I played all day and night, I couldn't get enough of that game. My first ever online console was an Xbox 360 back on my 10th birthday along with Halo 3 which I played non stop for the next like 3 years. I had unlocked Recon armor legit and was max rank online as the toxic little kid I was ? I started playing PC back in 2014 when I found out about CS:GO. CS:GO is still my favorite game that I currently play, love the competitive part of it. Not much else to really say about myself, I like to go to parties every once in a while and hang out with friends.

Current Favorite Games: CS:GO, Skate 3, Halo 3, Battlefield 1, 8 Ball Pool.

Throwback Favorite Games: Jak 3 (PS2), GTA San Andreas (PS2), GTA Vice City (PS2), Toy Story (N64), Halo 1,2, and 3, CoD: WaW (Xbox 360), MW2 (Xbox 360).

What can you bring to Skill? I can play games with other members if they are in need of a player, like for CS:GO and such.

Any experience streaming/video editing/competitive play? No sadly

Thank you for reading my application, I hope you consider letting me join your group ?

I originally joined Hack Forums in search of a original PSN which I found and then sold on Hack Forums had a bunch of great memories before I sold it as well.

Current Favorite Games:

I personally tend to play Town Of Salem a good bit along with Modern Warfare remastered but upon recruitment I'd mainly look to play Zombies on PS4 with out Skilled members.

Throwback Favorite Games:

COD BO1, FFX, FF7

What can you bring to Skill?

I can bring skills ? and a lot of fun zombie experiences

Any experience streaming/video editing/competitive play?

No.

Tell us a little about yourself: Friendly Canadian who likes video games.

Current Favorite Games: Runescape, Rainbow Six Siege, Destiny.

Throwback Favorite Games: Halo 3, Tom Clancy's Ghost Recon (2001)

What can you bring to Skill? Activeness in the subforum, organizing events, friendly banter. One thing I would like to do for the Runescape players in the group is have a weekly competition. The competition would be something along the lines of a "Skill of the Week". The competition would be based around a certain skill and whoever gains the most experience in the allotted time wins a prize decided by the event organizer, most likely RSGP.

Any experience streaming/video editing/competitive play? No extensive experience in any of those subjects, but I was Master rank 8 in Black Ops 2 League Play solo at one point, and Master Rank 2 in team play.

Tell us a little about yourself: I am a 17 (18 this Friday!) year old gamer from Southern California

who enjoys his fair share of screen time. I love chilling with friends online and meeting new players. For me, it's all about the fun.

Current Favorite Games: Overwatch, Rocket League, Skyrim, GTA

Throwback Favorite Games: This one is difficult. I would have to say Mario Kart 64 is by far my favorite throwback game. COD4, MW2, Pokemon (any version), and SSB melee also make the list.

What can you bring to Skill? A ton of activity and the willingness to meet and play with other members.

Any experience streaming/video editing/competitive play? I have done quite a bit of streaming and video editing in the past however I don't really feel comfortable sharing because you would know my irl identity and pretty much what I look like.

Tell us a little about yourself: I'm a fairly chill guy that likes to spend far too much of his time in front of a computer monitor. I can also be somewhat competitive at times, which I think would meld well with the spirit of this group.

Current Favorite Games: CS:GO, Gewnt, Legend of Zelda: Breath of the Wild, Hand of Fate

Throwback Favorite Games: I have to go with the classic; Super Mario 64.

What can you bring to Skill? I am an enthusiastic guy that plays a bunch of video games. I've also been hanging out in the Discord and I think the group would be a good fit.

Any experience streaming/video editing/competitive play? Some. I streamed a little on twitch when it was still justin.tv. Nothing too crazy though.

Tell us a little about yourself: I am casual gamer, enjoy playing with friends anytime.

Current Favorite Games: You should often find me playing CS:GO / Garry's Mod / Tom Clancy Wildlands / 7 Days to Die

Throwback Favorite Games: I loved playing a lot of Ratchet and Clank, Jax, Ghost Recon, etc

What can you bring to Skill? I can bring my activity and being a loyal player within the group itself. I spoke to you about my view on gaming groups prior Starstruck, so if this is actually going to what you say it's going to be like then I would be very pleased to join.

Any experience streaming/video editing/competitive play? The only thing I tend to play competitive on is CS:GO but other than that I have no experience with streaming/video editing.

Gaming Platform(s): PC, PS4, Xbox1 (I don't really play it, usually use it for entertainment center)

Region: Central

Tell us a little about yourself: Love gaming, man. Probably like most people on here. I've been gaming since Atari days, but didn't get into PC until I was like 12. I started with CS 1.3 and hopped my way along. I went competitive in CS:S, hit CAL-M or CAL-IM at some point then moved to CEVO and ESEA when that kinda died down. I mostly play FPS, but definitely love MOBAs (LoL and Dota2) and MMOs (WoW, Guild Wars, etc). Nowadays I split my time between PS4 and PC. I'm a hugeeee CoD fan, I only got into it around the end of Bo3, but I Master Prestiged in a few months, completed all the Zombie Easter Eggs, even the super hidden ones. I submitted a few glitches to the Zombies Reddit for Revelations so that was pretty cool. I mostly play CoD:IW now and pretty much stomp every lobby. Been wanting to get into competitive, but need some more good homies to play with. I could keep rambling, but all in all, I'm down to game. Oh, I'm 22, self-employed and have a cute husky named Mika.

Current Favorite Games: CoD:IW, CS:GO, and WoW

Throwback Favorite Games: I'll include pictures since that throws me back the most.

Spoiler ([Click to View](#))

What can you bring to Skill? Skill, of course. Lol nah, I'd mostly bring gaming activity if anything. When I say I play all the time, I mean..I play ALL THE TIME. I'd be down to make a group on CoD, CS or whatever the majority plays and run some lobbies. I've participated and hosted my fair share of competitive events so if there were ever any tournaments I could host the lobbies, set up the ladders, looks for cheaters, etc. I have streaming equipment for my PS4 and PC along with the know-how to do all that. I used to stream on twitch once upon a time so I could do that for the group. I mean I know a pretty decent amount when it comes to anything gaming so I'm pretty sure I could help out with whatever.

Any experience streaming/video editing/competitive play?Yes, kinda, Yes. (I kinda explained above without realizing so kinda makes this question redundant, but yeah man.) I'm not a great video editor, but I can cut clips, add cool little premade lighting and camera effects using After Effects and that's pretty much it. I did a cool camera panning with the CSS cameras awhile ago, but I'd have to brush up on it.

Sorry for the no fancy styling, I usually put cool graphics and such, but yeh.

Tell us a little about yourself: My name is Archery! I'm 22 years of age! I reside in Lafayette, Louisiana [yes, the country]. My hobbies are of course, video games! Without video games, I honestly don't know where I'd be. People don't realize that playing video games isn't just fun! Some people use it as a getaway from the real world sometimes. Some people can actually just be themselves when their on the mic with others, you know. Any who, I'm a college student, currently studying in Industrial Electrical Technologies. I also love working with computers! A friend & I work part-time fixing iPhones to make a little extra money every now & then. Besides much of this, I know that I'd make a great addition to this group! Not only by making friendships, but by also communicating & always being active. Plus, I love making contributions to the group & as a group, back to Hackforums. Thank you.

Current Favorite Games: Call of Duty: Infinite Warfare of course [Call of Duty freak here by the way]

Throwback Favorite Games: Every single Call of Duty ever made! Also Battlefield & Gears of Wars!

What can you bring to Skill? Not only can I bring being very active in the group & making friendships as I mentioned before, but will also make contributions to the group financially. I can also bring great character & morals into this group, as I'm very educated in self-help & lifting others up & being there for advice.

Any experience streaming/video editing/competitive play? I've never played in Major League Gaming, but I do play competitively among others online. As for video editing, yes! As I'm in the process of taking a video editing class in college.

I thank you for taking the time out to read my application & honestly hope that you consider me a member in your group. Best luck to everyone.

Throwback Favorite Games: I loved me some Star Wars Pod Racers.

What can you bring to Skill? I am a fun social person, love being on discord/skype/mumble/Ventilo to talk with people while we play games and just have a great time.

Any experience streaming/video editing/competitive play? I use to play CoD competitively on MLG, i've made a few videos back in my day but haven't gotten back into as far as streaming I streamed League 2 years ago but never got big because it was on twitch and the schedule was weird with it.

Region: North America

Tell us a little about yourself: I'm Marcus and I'm 23-years-old and I game whenever I can. I don't have access to a good computer or next-gen titles yet but nonetheless I love gaming. I have been gaming since I was just around 3-years-old, going all the way to the SNES days. Outside of gaming I do a bit of skateboarding though and work part-time jobs every now and then. Not at a good point financial to support my gaming but the love is still there.

Current Favorite Games: RuneScape 3, Battlefield 4, Skate 3, Skyrim, Tales of Zestiria, Hearthstone, Gundam Extreme VS Full Boost

Throwback Favorite Games: Vanguard Bandits, I've played it countless times and still one of my favorites. Halo 2 and Halo 3 were a TB for me too, dead games nowadays though. CoD MW2/MW3 are nostalgic to see, what introduced me into shooters. And there is a countless amount of PS2 games I enjoyed, they mainly shaped my love for gaming.

What can you bring to Skill? I can't promise that I'll bring anything next-level to the table, but I can promise that I will bring a good-positive attitude into the midst. I would even be down to do a bit of gaming with other members even though I'm not in the meta. Nonetheless I just want to share my love for gaming with others and vice versa.

Any experience streaming/video editing/competitive play? Only kind of experience I have is competitive play but mainly casual, nothing like participating in tournaments or clan battles.

Gaming Platform(s): The platforms that I currently game on consist of the Xbox One & PC. I recently got my new PC which maintains a GTX 1070 & i6700k processor which I was super stoked about. Ever since I got the PC, I have purchased GTA V, Overwatch, & H1Z1. I primarily focus on Overwatch for more a competitive aspect though.

Region: North America.

Tell us a little about yourself: Well, for starters, my name is Aaron and I am currently 16 years old. To say the least, I am one hell of a competitive gamer. From a young age, I got more into the competitive scene of Call of Duty which I first started playing on the Xbox 360, my first ever CoD was MW2 and loved the series ever since, but when Blackops 2 came out, I had a huge passion for league play (competitive league) and ended up grinding the hell out of the game and got Masters every season I played then finally eventually led up to me doing some tournaments on UMG & Gamebattles. Now, I mainly play Overwatch for competitive and it's basically what I do for a large portion of my day. Other than that, I am usually playing GTA V or H1Z1. I love chilling with other people when possible and just love to create a positive environment / vibes.

Current Favorite Games: My current favorite games have to be Overwatch, CoD Modern Warfare Remastered, GTA V, & CS:GO.

Throwback Favorite Games: Modern Warfare 2 & Blackops 2 for sure. MW2 because it was the first FPS game I ever played and it practically introduced me to the gaming industry. Then, Blackops 2 because it introduced me to more of a competitive aspect to games making me grind the hell out of games more.

What can you bring to Skill? I can bring my passion for games into the group. I wish to interact with others who have the same passion as me, as I would love to have a variety of more players to play with. I would also love to bring different topics / discussions about different games into the sub-forum to see different opinions / view points on certain games.

Any experience streaming/video editing/competitive play? My experience would have to be competitive play because that is literally all I do unless I am just chillin' with some friends playing some GTA V. I grinded the hell out of Masters every season back in BO2 and now I play Overwatch competitive on the PC as I work my way up to Top 500 on there. I can also video edit as I have done in the past but it is something I could definitely work on.

Tell us a little about yourself: I'm an average teen that wastes his life gaming on a daily basis. I spend numerous amounts of time playing video games with friends, which is a pleasant experience. I've met many different type of people online and I wouldn't mind meeting more. I'm very social and kind once you get to know me, too!

Current Favorite Games: Rainbow six siege, cs:go(terrible at), GTA 5, call of duty(all), battlefield, assassin creed(all), and Skyrim.

Throwback Favorite Games: call of duty, PAC-man, space invaders, Pokemon games, frogger, and Mario.

What can you bring to Skill? I'm a very active participant that would give most, to all my hours into the group. I'm very active both on hf and console gaming. If I'm not on hf, I'm probably gaming! I would love to see this group to its full potential and I think I could help get you there!

Any experience streaming/video editing/competitive play? I'm familiar with all those subjects but more familiar with comp. I've played many GB's in my call of duty career. However, it's been awhile since I've competitively played but I could get back into it.

Thanks for reading my post, have a nice day!

Tell us a little about yourself:

I'm 19, born in Miami, and was raised by two amazing parents. The first time I picked up a game was around 2006, my dad had a flip phone and I would play Tetris on it whenever I could. A few years pass, I'd say I'm 9 or 10 and I get one of my first consoles, Playstation 2, I still have the console as of right now and loved playing Twisted Metal Black, Ratchet & Clank: Deadlocked, and by far one of my favorites: War of the Monsters & Spiderman 2: Friend or Foe. I then got the Wii, I still remember my dad coming home one morning randomly with a Wii along with Animal Crossing, played the whole game, and also LOVED Super Smash Bros! These game's made my childhood, I still got good grades as I was valedictorian in 5th grade. My next console changed everything, the Xbox 360. I remember playing Tom Clancy's: Rainbow Vegas 2, and Gears of War 2, made many memories and my bestfriends IRL in the COD series: MW3, BO2, and Ghosts. I'm currently finishing up high-school, senior year. Going to major something in business and economics, or graphic designing.

Current Favorite Games: Gears of War 4

Minecraft

Overwatch Throwback Favorite Games: Ratchet & Clank: Deadlocked (PS2)

Super Smash Bros (Wii)

Gears of War 2 (X360) What can you bring to Skill?

I have A LOT of knowledge on many games that are currently "big" as of right now, such as CS:GO, Garry's Mod, Rainbow Six Siege, Overwatch, and many more, therefore I can answer a variety of questions, especially in a gaming group. :) I also am an experienced graphic designer, if anyone would like a thread design, or banner, I would gladly create one for them.

Any experience streaming/video editing/competitive play?

I do stream games on my Xbox for my friends to watch, and I used to also create b-hop videos in Garry's Mod for fun. So yeah, I'm not really on the video side of things, but I do have the knowledge on how to use those tools.

Thank you for taking your time out of your day to read my application. Hope I make it, excited for what the future brings to Skill.

PC mainly.

I've been gaming for 20 years though so I'm well acquainted with all platforms.

PC is preferred for obvious reasons.

Region:

The Internet.

My sleep/wake times switch constantly depending on work.

Never have any issues with high ping no matter which servers I play on.

Tell us a little about yourself:

My name is Fucci, I'm a 20-25 year old PC gamer.

I am currently playing Overwatch, Halo Online, and CS:GO here and there.

I'm a community leader for local eSports events and tournaments.

I also moderate a community of over 700 Overwatch players locally.

We are about to sign a deal for tourney prize pool sponsorship.

Current Favorite Games:

Overwatch is bae rn <3

Halo Online

Throwback Favorite Games:

GunZ Online

All the Halo games pretty much up to Halo Reach.

What can you bring to Skill?

I'm an event planner and organizer during the day, and I would love to help out running events if that's a plan down the road!

I have been running Clans and Guilds for over a decade on basically every MMOG I've played, it's taught me great leadership and management skills.

Any experience streaming/video editing/competitive play?

I've got minimum experience with Streaming.

Somewhat amateur video editing.

Competitive gaming in every game I've played since I was a kid, 10/10 experience level.

Thank you for considering my application!

Tell us a little about yourself: Been partnered on TwitchTV since 2013, but decided to go back to college rather than stream full time. I started out with Minecraft and became friends with a lot of big names (Sethbling, SkydoesMinecraft, Lanceypooh, Brenybeast, etc) and when Oldschool Runescape released, I switched to that and that is what made my channel take off. I got bored of Runescape and decided to get back into school, so my viewer count went down drastically, but I still play games/stream occasionally.

I have about 1400 hours in Rocket league, play very little csgo, some h1z1, RotMG, and many other titles for fun.

Here was an article written about me when I streamed for Zynga to about 1,000 people:

<http://gamesided.com/2013/10/24/solstice-arena-gamer-goes-24-hour-livestream-twitch/>

I almost had a sponsorship from Monster Gaming as well.

Current Favorite Games: Rocket League is my go-to game at the moment.

Throwback Favorite Games: Habbo Hotel (Back in the day when "AIDS" were in the pool) and Runescape, and League of Legends

What can you bring to Skill? My knowledge of games/gaming goes on and on. I am looking for new games to play with other members quite often and I think this will revive my interest in streaming/playing games seriously again. I can also help other member's when they have questions.

Any experience streaming/video editing/competitive play? Explained above, I started streaming on Twitch when it first came out, got to about 12.5k followers legitimately, had a few articles written about me, was on the front page rotation (still can get there if I message partnership, just don't know what game to stream for it), and got a sub button. I have made youtube videos in the past with other big names (TheZombiUnicorn, JackFrostMiner, etc), but never stuck with it since I was streaming at the time.

I have used Sony Vegas for editing in the past and was on a team called "Vanity Esports" which never got too big, but it was a sponsorship none-the-less.

Tony Hawk's Underground
and a few more.

What can you bring to Skill?:

I'm an extremely active member, usually always browsing when I'm not working/busy/gaming. I'm always up for some gaming, if I have the game of course. On Xbox One / 360, I am an achievement hunter, so I'm always doing that when I'm not playing PC, Always trying to get the 1000/1000 or whatever the amount of gamerscore is (But I've acknowledged, I'm not going to get every achievement in every game). So I can bring my active ass to the group.

Any experience streaming/video editing/competitive play?: Yeah. I've streamed a few times, not really sure how I feel about it though... I don't have the best upload speed so streaming isn't something I can really do often. I know enough about video editing to cut clips, add color correction & twitxor. I used to play Gamebattles back in the day (over that now, to many morons for my liking).. I used to do competitive sniping back in the Mw2 days (was the leader of a very successful team). As for the streaming and video editing goes, I know just enough to where I don't really need help with much, I mean I'm not good at editing, but I know enough (trying to expand on it though).

Region: Europe.

Tell us a little about yourself: Hi! My name is Lookin here on Hack Forums. I am twenty-years-old and a resident somewhere in Europe. I am an ex-competitive Counter-Strike player who used to play for a few former big teams including Dignitas, SK, and NiP. This was in the earlier days, primarily 1.5 - 1.6. Ever since then, I have decided to let that past be, as I had no interest in playing competitively anymore because I have had great jobs, which I would not exchange for anything.

I used to be a caster for Gfinity for a while, primarily CSGO - I tried League of Legends casting for a little, but I honestly could not keep up with the flow let alone knowing what to say, as I do not

actually play the game. I was casting for approximately a year to two and did cast for some other large cups as an assistant-caster. Because I used to be a caster, I decided to make a free voice-over requesting thread here on Hack Forums which has been used a bit, and I love the positive feedback I have been getting after doing these voice-overs for people. I have also been contacted by quite a few people here on Hack Forums, where they hired me to do some voice-overs for their upcoming game, and I have done some voice-acting in quite a few games developed by Hack Forums members.

Alongside all the chit-chat. I am a stand-up guy, I am extremely kind, and I strive to be as HQ as possible. I always try to maintain a good-guy aspect, as that I just who I am in real life as well. I see no reason to act like someone you are not, just because we are in an online universe. I have no reason to lie about who I am, and I would rather be acting friendly than a dick, due to the nature of me just always striving to help people and be a good guy.

Current Favorite Games: Counter-Strike, Grand Theft Auto V, (Would love to get into OSRS again - almost maxed) and I enjoy Rust once in a while.

Throwback Favorite Games: Counter-Strike 1.5, Counter-Strike 1.6, Zelda, GoldenEye 007, Duke Nukem 3D, DOOM, Tekken, Wolfenstein 3D, Diablo, Quake, Unreal and so much more, I miss all the classics so badly.

What can you bring to Skill? I can bring a kind, fun and a skill-full guy. I always strive to make people laugh and be happy - whenever I see someone feeling down; I always try to talk to them and make sure they end up happy before our conversation is over. I am a stand-up guy who just wants to have fun and enjoy life. I would love to bring my humor and personality into the group, as I feel like I could make a lot of new friends and just share some of my experience from the competitive world to inspire a lot of people to go for it. I would also love to host game nights in everything from new to old classic games. I am sure we could have a lot of fun together.

Any experience streaming/video editing/competitive play? As I have explained in the "tell us a little about yourself" I explained how I used to play competitively in CS 1.5-1.6 and that I used to cast for Gfinity. Among my competitive side, I have also streamed around two years ago, where I used to stream FIFA. I used to maintain an approximate of 1.5-3K viewers every stream, but I had to quit due to the fact that my job took all my free-time. I have been considering to start up streaming CS again, but I just don't know right now.

I have been playing games since I was 3 years old and I have not stopped since then. At the moment I mainly play CSGO, I own a private reportbot which I use to ban cheaters in the game, ([clearning CSGO one by one since 2016 :P](#)) I still enjoy gaming and all elements of it. I like to play competitively however chill gaming is also enjoyable for me.

Current Favorite Games: Every Counter-Strike, Arma 3, GTA V,

Throwback Favorite Games: I remember playing Quake 3 multiplayer back in primary school in the IT classroom against my friends, best moment was when I managed to kill a good player called Atte while in the air with the sniper rifle of the game.

What can you bring to Skill? I have skill in CSGO and Arma 3. Over 1.2k hours on both games. Non afked.

Any experience streaming/video editing/competitive play? I have streamed, edited and played in a couple of offline competitive tournaments in big arenas as an amateur, never went too far however I've been there and experienced it. The difference between normal competitive play and offline competitive play against people for real money is massive.

Playstation has been my main console for the last year or two. I own wireless Astro's for a headset on consoles and an older Turtle Beach x11 headset for PC.

Current Favorite Games:• Fallout 4

- Skyrim
- Call of Duty BO3
- Rocket League
- Call of Duty IW Throwback Favorite Games:
- Call of Duty BO1
- Minecraft
- Crash Nitro Kart
- WWE 2001 (I think)
- Call of Duty MW3

I'm not a very competitive gamer anymore as I don't have the time to invest in being that good with college and a business to run. But I am a very chill person willing to help setup game nights and participate in whatever. Just looking to have fun with other gamers and discussing upcoming games, hardware, etc.

Any experience streaming/video editing/competitive play?

I used to be really good at Call of Duty BO1 and MW3 for competitive purposes but that was years ago and going back I suck lol. But I can pickup on things fairly quickly in order to be at least decent. I've never done much for video editing or streaming either.

Currently PC. I have both next gen consoles and a PS3 that I hardly use unless I want them nostalgic feelings. Although recent events have forced me to play on my xbox more often.

Region:Australia/Zealand.

Tell us a little about yourself: I'm 24, male & have been living in New Zealand/Australia my entire life, I consistently move between the two depending on where work is in favor. I'm an Electrician, nothing special but it's more then enough to feed my addictions.

I started playing "Games" since fuck knows, lets be honest. My first console I owned was a N64, I know every piece of dialogue in the Original Zelda, Orcania Of Time. I grew up alot differently to the rest of my family/siblings. Even though I played multiple sports I apparently still was the lazy cunt in the house because I was that one kid in the family that was obsessed with the Gaming world. Funny story right, my Mum cancelled my subscription with EB games, they just sent weekly magazines out and stuff.

Once I grew to around the age of 16 mum decided to give up with her anti gaming bullshit and I started to build a setup, I had 2 monitors (one for recording with my Elgato and the other for my ps3.

Sporting has also taken a large path of my life, I started playing Baseball at the age of 4-5. I remember it being this one kid and I that had a neat little setup going on. When I was pitching he

would sit on first base, because our skills together was just fucking unfair at the 4-5 age level we pretty much ate ass all season. I then went on and played Football for almost 2 years again (I quit due to an ankle injury, I played left wing. I love football with heart, but I hardly enjoy it when I play anymore. Rugby League followed by Ice Hockey completes my sporting career (Club based).

Side hobbies consist of Skating, ask me anything! I'll know it. I collect apparel and some stickers, (More than happy to show). I draw and design often.

Current Favorite Games: Well fuck, this isn't an easy question :(Just saw the next question, I'm assuming this means the favorites currently that I have. If so, I've been playing a lot of The Witcher 3, GTA V and of course the classic that everyone plays anyway like CS, LoL, Dota etc, I've played them all reaching a somewhat decent rank.

Throwback Favorite Games:

Zelda, Mario Kart, Mario 64, THPS (1/2) were the best imo.

What can you bring to Skill?

Glad you asked this question, I have an interesting idea that I could bring into Skill that would be really neat.

Other than that I love chatting and communicating with others, just because the group is about Gaming doesn't mean I won't ask what your favorite sex position is. I enjoy learning about people, gaining knowledge etc.

Overall if you decide to choose me I can assure I'll be an asset towards Skill.

Any experience streaming/video editing/competitive play?

I can stream if needed, I have the required essentials to stream perfectly without lag etc.

[i]Competitive play? Cute question.

Not much needed to say here, I have some strange desire to be the best rank on any game I play regardless of how shit the game is. I just love seeing my name on the top of that leader board and getting a message from your mates saying get the fuck off the computer.

----- Thanks for letting me apply anyway, was a bunch of fun!

Current Favorite Games: My all time favorite game is called osu! It's basically a competitive rhythm based game with a ranking system and almost an infinite amount of maps (songs) to play made by the community, which is over 10 million strong. I've been playing it for about 2 and a half years now. My profile: <https://osu.ppy.sh/u/6554821>

Throwback Favorite Games: Super smash bros is one and probably always will be my favorite throwback game. Not to mention GoldenEye 007 and Mario Kart on the old N64 (my dad has all the old consoles).

What can you bring to Skill? I'd love to bring the not-so-mainstream game osu! into the group! I've seen a few members on HF that play the game, some are actually pretty good too, but I'd like to make the game wayyy more relevant. It's such a good game and I wish more people knew about it, hopefully I can get the group hooked! ?

Any experience streaming/video editing/competitive play? Sadly, I don't have any experience with streaming or video editing. My internet is not the best so I can't stream consistently for long periods of time and I've never really had to edit any videos before, although I do know the basics I guess. I used to play competitive CS:GO, but that was at least 6 months ago.

If you want to hear it to get to know me better for whatever reason, feel free to PM me. I play guitar and I LOVE to game. Been gaming since the first DS came out. Me and my family were traveling a lot at the time, so my dad bought it so I would be entertained. I loved that thing and I played it all the time. My favorite gmae on there was super mario 64 DS. I eventually got a Xbox 360 for Christmas when I

was in 5th grade. Before I was banned off my first account, it was a 6 year with 30k legit gamerscore, which to me I thought was somewhat impressive. The next gen consoles game out like the Xbox One and the PS4, but my dad didn't get us the new one because he didn't think it was worth it. Well 2-3 months ago, with my money I had from my last summer job, I bought a PS4 CoD infinite Warfare legacy edition bundle. (Don't worry, I got it for modern warfare remastered). I then got madden 17, madden has been my favorite game for years. I was so happy because I got to finally experience it on next gen with all the better features which made the old gen version look like shit.

I also have the Elgato HD60 capture card, so if you want me to record something on PS4 for the group, I can do that with no problem.

Any experience streaming/video editing/competitive play? I have streamed before, not very experienced though as I did it mostly for fun. I can do basic editing, and I have done competitive play before. I was in a clan called TZA way back. I joined and helped them win several MW3 clan battles. I wasn't at the point where they would have me participate in the battles at first, but at the last second, one of the people that were suppose to be on the 3 man team wasn't able to play. So I was I guess you can say "an emergency substitute". Well, we won and they were impressed enough by how I played that they had me participate in battles regularly. Due to personal issues in my life and hospitalizations, I ended up just "disappearing" from the clan. Felt bad for not saying anything or saying goodbye.

Tell us a little about yourself: I've been gaming for 15 years now, creeping up on 16. It all started when my dad bought a PS2 and I quickly found a passion. Over the years I've spent hours of my life on just about every mainstream home console, every mainstream handheld, and of course PC. I can't say much else other than videos games helped me become the person I am today. These days I work 45 hour weeks so gaming can be hard to squeeze in but it certainly does take up a lot of my free time. Other than that, music production and DJ'ing, and getting back into GFX take up the rest of the time.

Current Favorite Games: Battlefield 1, Horizon Zero Dawn, Stardew Valley.

Throwback Favorite Games: X-Squad, The Warriors, Pokemon Leaf Green/Fire Red, virtua cop

What can you bring to Skill? I'd like to think I can provide banter, knowledge, and just general support and contribution. I've got quite an extensive music library if people need music for their videos, and I can mix music if people want their music mixed. As I'm also getting back into GFX after a three year hiatus I'm happy to provide free graphics, just don't expect miracles. Also looking to acquire the full Adobe CC suite so potentially even editing videos.

Any experience streaming/video editing/competitive play? I used to stream Minecraft Beta 1.7.3, used to edit CoD MW2, Black Ops, MW3 videos, and used to play Black Ops and MW3 somewhat competitively.

Skyrim

For Honor

Throwback Favorite Games: Conkers Bad Fur Day

Conkers Live and Reloaded

Rainbow Six Siege

COD: BO2

COD: MW2

What can you bring to Skill? It depends really.. I have many skills but what I can bring is loyalty, trust, and enthusiasm while having a fun gaming together, as well as being able to advertise and keep the group with positive rep, remain active, give my knowledge, share my expertise, and so much more!

Any experience streaming/video editing/competitive play?

I love to farm for things on games, I have a competitive play attitude, I have streamed many games before. I have never video edited, but I do have some videos of me wrecking on some games and making those kids look as if they just picked up a controller.

Throughout this time I'd say I've grown into a more of a competitive state and just about in any game I start to play I end up being in a competitive state with it, which I enjoy.

Current Favorite Games:

Rainbow Six Siege, Battlefields although #1 got pretty boring relatively fast, Cods, and just about any halo.

Throwback Favorite Games: Halo 3 & Mw2.

What can you bring to Skill? What I personally can bring to Skill is a good ass time. ? I would say I am a very active person if I can find something enjoyable to do. Not only that but I can bring great content and entertainment for everyone else too.

Any experience streaming/video editing/competitive play? I've messed around with twitch before but never taken anything seriously just the same with video editing as well. Personally never took the time to purchase a PC and just rocked a console 24/7. My competitive play although is a different story I've had experience with games from cod 4 all the way to rainbow six siege which is a good span of time. Not only this but I took part in Views gaming contest for black ops 3 on Xbox One which I won the \$75 for first place. That primarily is what I'm hoping to see in skill is fun competitions I can do with other members.

Tell us a little about yourself: Call me Epi. I'm 20 years old, soon 21, and I come from Denmark. Weekdays go by with school, and in my free time I'm out with friends or at home with my PC. I spend most of my time out, drinking and smoking a lot, but I find my time to still play videogames a fair amount weekly.

I'm a gamer at heart, been gaming since I was 5, when I got my first console, which was the PS1, along with games like Crash Bandicoot, Spyro and Croc. I spent countless hours completing every game I owned.

I upgraded to PS2 later on and got games like Crash Bandicoot: The Wrath of Cortex, Jak and Daxter, Ratchet and Clank.

You know when you do something and it just feels right? I think we all feel that about videogames. So I was a console warrior from the start, but once I got a PC, my gaming experience completely changed.

Starting out with a game like CS 1.6, I quickly got obsessed with the FPS genre. And it paid off, playing at Global now.

Current Favorite Games: I don't too much time to play, so the time I do have, I spend in CS:GO.

Throwback Favorite Games: oh boy I'll try and keep this short

Crash Bandicoot

Crash Bandicoot 2: Cortex Strikes Back

Crash Bandicoot 3: Warped

Crash Team Racing

Crash Bandicoot: The Wrath of Cortex

Crash Twinsanity

Spyro the Dragon

Spyro: Year of the Dragon

Spyro: Ripto's Rage!

Jak and Daxter

Ratchet and Clank

TimeSplitters (1st)

TimeSplitters: Future Perfect (3rd)

If anyone is a fan of TimeSplitters, have you heard there's a new fan-made game coming out later this year? TimeSplitters: Rewind

There are many more, but I think I'll keep it at this for now.

What can you bring to Skill? I'm personally a funny, loyal and honest guy. I like making new friends and I like spreading cheer.

You might have seen me hopping around the forum being a jerk, but you have to let steam out sometimes.. Usually I'm a jerk to people who I know can take it.

I expect the people in Skill to be able to take a joke, afterall, if you're a gamer you probably know how to control your temper.

Now for a little bit about myself, I'd say I'm a chill guy to hang out with, but I do like to fuck around a lot, but when it comes to competitive play though I take it very seriously. Overall I think I can be a fun person to play with. I play League of Legends mostly now, I'm really trying to get good and I'm sure there are some nice people in this group who are willing to help me with that.

Current Favorite Games: League of Legends, CSGO, Halo, Assassin's Creed and Call of Duty.

Throwback Favorite Games: Halo 1, Halo 2, Halo ODST, Call of Duty: Modern Warfare 1/2.

What can you bring to Skill? Since I play pretty much every day I can play with a lot of people from the group too. I'd actually like some people who can help me with League because I'm bronze lol. Other than that I just have a lot of general knowledge about games, so I can help people with whatever as long as it's gaming related.

Any experience streaming/video editing/competitive play? I don't have any experience with video editing and streaming. I have played a fair bit of ESEA and Faceit on CSGO, the highest I've ever got on cs was LEM, but that was a long time ago and now I just play a couple of games of comp every now and then. Current Favorite Games: The Division, GTA V, Ghost Recon Wildlands, Black Ops III, Elder Scrolls Online, Minecraft, and World Of Warships.

Throwback Favorite Games: Ratchet and Clank: Deadlocked and Red Dead Redemption.

What can you bring to Skill? Honestly, I can bring a fun atmosphere into Skill.

Any experience streaming/video editing/competitive play?

Streaming/Video: None

Video Editing: None

Competitive Play: Yes.

Tell us a little about yourself:

I'm a student from England and I'd say I'm a chill guy yet quite serious about competitive gaming. Started gaming when I was eight years old; introduced by my brother to the PS1. He shortly introduced me to WoW and LoL after that which I have played on and off for the past years. I've been hooked ever since, to both computers and gaming. Video games keep me entertained and I really haven't got bored of them since I have started playing. In the competitive scene, I have become both a Top 500 Player EU in OW and was previously a competitive CS:GO player playing at a semi-professional level within my country. I have retired mainly from competitive gaming for now; hoping for a game that'll spark my interest in the eSports scene to be released in the near future. I'm

a gamer at heart and hope to be so for the rest of my days.

Current Favorite Games:

ArMA 3

Overwatch

osu!

Throwback Favorite Games:

Fallout 3

Call of Duty: 4

Half-Life 2

What can you bring to Skill?

Experience and a passion for gaming are everything I can bring! I'm a lively guy who isn't shy from having a discussion about gaming, I have a clear passion for eSports and Gaming in general, which allows me to be able to give my insight and discuss almost anything relating to gaming. This also allows me to help members improve their skills within gaming, I'm willing to help anyone out if they need it. Will happily be active on the sub forum as it'll really relate to what I like to talk about!

Any experience streaming/video editing/competitive play?

I have a minimal skill in streaming and quite a little in video editing, yet competitive play is where I shine. As said before, I have gained experience in the eSports scene in numerous games and am willing to share my knowledge of this to other members of the group! If anyone needs coaching in Overwatch or CS, I'd happily help them out along with looking for new people to play with. Gladly wasted 3000 hours of my life on CS:GO along with 1300 on CS:S so any questions on these games I'll have covered.

Thanks for reading the application, cheers!

Region: Europe (United Kingdom)

Tell us a little about yourself: I'm a keen gamer in my spare time. I enjoy socialising in parties on Xbox Live and playing FPS and strategy games. I'd have to say that I use my Xbox One the most out of the gaming platforms that I use. My favourite games on Xbox One would probably be GTA V and Halo, just because those are the games that my friends play the most. I currently have GOW 4 on order and would love to find members of HF to play that with when it arrives. Outside of gaming I am a full time student. I generally spend a lot of my spare time playing video games so I believe that Skill would be an ideal group for me to spend my time in on HF.

Current Favorite Games: GTA V, Halo (all), Forza Motorsport 6, Minecraft

Throwback Favorite Games: Warcraft 3, Diablo 2, Super Mario 3 (haha), Fable (series), GTA San Andreas

What can you bring to Skill? I can bring my love for video games and generally being a social and friendly member of the community. I would love to find and play with fellow gamers in the HF community.

Any experience streaming/video editing/competitive play? I do not have any experience with these, but would love to learn more about these and possibly start hosting a few streams of my own in the near future. That would be great.

Thank you for the consideration.

Region: Central Time (CT)

Tell us a little about yourself: I am 18, Have owned almost all generations of playstation consoles, I usually only play PC games. I Just enjoy gaming in general, specifically survival and base building games but I am open to any type of game.

Current Favorite Games: Rust, Ark, H1Z1 KOTK, Arma 3, Gmod

Throwback Favorite Games: Skyrim, Mount and Blade Warband, 007 goldeneeye(N64), Starwars Battlefront 2, Super Smash Bros(N64)

What can you bring to Skill? I play a ton of Rust, probably my favorite game. I would consider myself skillful in any survival base building game really. I would love to just be a part of the community and get to know and game with other users.

Any experience streaming/video editing/competitive play? I do have experience streaming, not very large viewer base or anything just small streams. I also did have a youtube channel that reached 2k subs before I quit just out of disinterest in the past. I have some video editing but I have not edited in a while.

Tell us a little about yourself:

I'm very outgoing and generally mix well with a blend of personalities, regardless of how big of a difference there is. When it comes to gaming, there's nothing more that I enjoy than being able to play with a group of people, it simply just intensifies the overall game play experience, and creates room for good memories.

Current Favorite Games:

At the moment, I'm only playing Overwatch, and hoping to get into the new releases relatively soon.

Throwback Favorite Games:

Ninja Gaiden & Fuzion Frenzy.

What can you bring to Skill?

I'm a very high ranked player on Overwatch and held a decent following on Twitch for quite a while. I could bring my competitive experience and knowledge of both League of Legends and Overwatch to Skill; teaching people different strategies, how to improve on their strengths, and identify weaknesses. I can also bring lots of fun and humor to the table.

Any experience streaming/video editing/competitive play?

I have zero experience in video editing. However, I've streamed for quite a while, and participated in the competitive scene in League of Legends around one or two years ago with amateur / NACS teams as a staff member.

Tell us a little about yourself: I am a 24 year old who owns my own business dealing with I.T. solutions for other businesses locally in my town. I have been a huge into online gaming since the xbox original era back in the Halo 2 days when I was 9 years old. I spent so much time playing match making on Halo 2 until the release of the xbox 360. That is when I got into Cod 4 and found out about what Gamebattles was. I also spent most of my teenager life playing halo 3 which was probable my favorite online game to this day. I had a 50 in every playlist on that game besides Throwback which most of the time that playlist was out I was stationed over seas for active duty. Nowadays I have become more of a PC gamer playing a ton of H1Z1 primarily which I am royalty on. I definitely believe I am above average when it comes to skill level when playing competitive games. Therefore I most certainly believe this group is very fitting for myself.

Current Favorite Games: My favorite games right now would be H1Z1 KOTK (1,200 hours logged), CS:GO, and Rocket League

Throwback Favorite Games: I have so many favorite classic games such as Zelda OOT, Zelda A Link To The Past, COD 4, MW2, Halo 2 & 3, ect. The list really could go on and on!

What can you bring to Skill? At this very moment I log roughly 50-60 hours of gaming a week. I will

do my best to contribute as much as possible to the group and devote my time to playing competitively if wanted on pretty much any game or console. I can bring my experience with games such as H1Z1 KOTK to new players and people who potentially want buy and learn the game. I will take time out of my day to help any of those who may have questions regarding things such as streaming as I know a ton about setting up streams.

Any experience streaming/video editing/competitive play? I do not have much experience with video editing, but I have 12 years+ experience with competitive gaming and still competitively game to this day. I am willing to play competitively on Xbox One or PS4 for gamebattles. If there are members interested in doing so. I can also play CS:GO and H1Z1 KOTK competitively.

I'm Cooligan, friends call me Cooli. Some know me as a person who likes to help others, others don't know me from Adam. I'm just a laid back dude who likes to make new friends everywhere he goes and usually doesn't find many enemies along the way. I've been waiting for a gaming group to come back to HF for a while and, well shit, what more of a fantastic way to do so other than to bring one back, Skill. When I saw someone wearing the userbar I wanted to immediately join.

Current Favorite Games:

CoD4 Remastered (Shoutout original CoD4, you da true MVP)

GTA V

Skyrim (I recently installed this one on my xbox one so I could play it again with better graphics)

Rocket League

I have so many damn games for xbox one and I like too many of them to list so just hit me up to play and I'll most likely have it.

Throwback Favorite Games:

CoD4 (See above shoutout)

MW2

GTA San Andreas - IV

Mario Kart (Ahh, the good old days :) wow, just had to stop typing and straight reminisce for a second..)

There were some free online games that I'd play on sites like gamesloth.com (for those of you who remember) that I'd play for hours and hours. They were so damn fun.

What can you bring to Skill?

An insanely active, friendly, approachable, helpful, loyal, down to earth, all around laid back dude.

Any experience streaming/video editing/competitive play?

I was introduced to competitive gaming by a friend of mine in the year 2010 during my college days. I have played competitive COD4 in many tournaments in India including BYOC. I founded a clan vG and ran 2-3 COD4 servers in India (No. 1 servers of its time). I started with DoTA 2 in 2012 and left competitive COD4 Promod in 2014. I have also played competitive WOT (World of Tanks), then stopped playing since last year as my teammates got busy with other things. I had also co-founded Indian Esports Community and successfully organized tournaments sponsored by MSI.

Tell us a little about yourself:

I used to be a huge gamer before taking a break from gaming and went into researching about computers/hacking. I have started playing video games

by the age of 4 and the first game I ever played was Halo Combat Evolved (According to my brother). Video games have always been a huge part of my life and the first console I ever got was a Xbox, this is where I played Halo Combat Evolved

and Halo 2. After the Xbox came a PS2 where I played my first Grand Theft Auto game (GTA SA) which is probably still one of my favorite games to this day. Eventually I went to the Xbox 360 and owned one for well over 5 years. I dipped my toes into

the modding scene around the time GTA V came out for last gen consoles and modded GTA IV. That sparked my urge to research hacking. It was a tough choice later on to switch to PC gaming because I had no friends that had computers at the time,

so I fully switched to PC gaming and never looked back. Sometimes I still wonder what my life would have been like if I never switched. If I had to choose one point in my life that impacted me the most, switching to PC would have been it in the long run.

Current Favorite Games:

Arma 3, CS:GO, GTA V

Throwback Favorite Games:

Halo Combat Evolved, Halo 2, Halo 3, Halo Reach, Battlefield 3, Just Cause 2, GTA IV, GTA SA, GTA Vice City.

What can you bring to Skill?

I can bring a great member of the team to skill. If there is a CS:GO team I am all down (MG2). If any Skill members want to join the Arma 3 community I am glad to show you the ropes :3

Any experience streaming/video editing/competitive play? Streaming:

Tell us a little about yourself: I've been playing games whether that be on console or PC since I was very young. I had a shitty laptop for about 5 years until about 2 and a half years ago I got a sick PC which can run all my games at really stable frames, I was so hyped about that

Current Favorite Game: Overwatch (PC)

Throwback Favorite Games: MW2 (XB360), Crash Bandicoot: Twinsanity (PS2 + that shit was fire)

What can you bring to Skill?: I can bring a very fun, animated personality. I am a very active and social member and will try my best to tell/teach everyone, everything I know. I also love to play with others so this is one of the best opportunities I can get.

Any experience streaming/video editing/competitive play? I had a YouTube channel (that is now deleted due to being hacked) which had 2.5k subscribers and was quite big in the CS:GO gameplay/gambling scene, I was getting sponsorships which was also really fucking cool. I have edited videos in Sony Vegas for about 3 years, even when I had a shitty laptop.

Thanks for reading, I wish the best of luck to all applicants and I hope to be in a group with you all very soon. If you need me for any reason feel free to PM me <3

Some of my favorite games are the Mass Effect OT, Fallout universe, and the Witcher world. I have well over 290 games in my Steam collection alone and pride myself on my unique playstyles. I'm competitive but not to the point of being offensive.

I'm open to playing almost any type of game out on the market and I tend to take my time to enjoy the stories and characters created. You won't find me rushing through a Call of Duty map, instead I'll be reading through each novel in the Witcher 3 or Skyrim, trying to absorb as much of the world as I can.

I know the play style that I like, and I stick by it.

Current Favorite Games: Mass Effect Andromeda

Witcher 3

Fallout New Vegas

Diablo 3

What can you bring to Skill?A unique personality along with my love for video games and story. I'm a conversational person, I love taking part in projects and events. I rarely have any drama with someone else, and I'm easy to approach.

Any experience streaming/video editing/competitive play?Yes, actually! I've streamed on several occasions and have a few videos up on my YouTube channel. Of course it's an old project that I've since abandoned, but I'd love to bring it back if given the time.

Current Favorite Games: Overwatch (High Diamond), Insurgency (Mostly competitive) and the classical counter strike source, I do however own global offensive aswell.

Throwback Favorite Games: MW2 on the PS3, Pokemon, Halo 3, GTA SA.

What can you bring to Skill?: A good attitude, teamplayer and a sprinkle of skill on the fps side of games. I also own a dedicated server if a teamspeak is needed. And of course just hoping to be a part of some awesome gaming nights.

Any experience streaming/video editing/competitive play? Used to play competitive on css, now I mostly play on Insurgency or Overwatch. My video knowledge is nothing more than that one Minecraft let's play video I made like 8 years ago haha.

Region: Western Europe

Tell us a little about yourself: I am a young guy who lives at my own apartment, daily i work at my own workshop alone, where i work on scooters, motocross, motorcycles and atvs mainly.

I spend most else of my days when im not working out with friends either just chilling, playing ball or what stuff we might come up to :D Besides that then i play alot of computer or playstation, and have always been interested alot in computers and all sorts of electronics., not just gaming alone :D I have my laptop on almost from the moment i get home till i go to bed aswell hah

Current Favorite Games: Battlefield 1 and Fifa 17 is the main games i play on Ps4 at the moment. But 2 other games i love but only play rarely is Rocket league and Ark. Thinking about buying the new Ghost recon because I have alot of irl friends who play it also :D

I recently took a long brake from PC gaming since i got my new PS4, but i still play Counter strike source a couple times a month, thinking about buying CS go also.. I used to play LoL alot like a half year ago, but had my main account banned, and really lost my spark for the game after that.

Back in my younger days i spend who knows how many hours, days and years on World of warcraft and diablo, heroes of might and magic and risk 2 :D also alot other games ofcourse.. Also was a huge pokemon fan back when i was younger, still remember my first pokemon blue and red game when i got my Gambe boy ;D

What can you bring to Skill? I am an active and social gamer, and daily play different games on either PC or PS4, mainly PS4 at the moment tho, so i could bring my activeness to tournaments , group pplays or guilds, love to talk and have fun with people on skype , teamspeak or just chat partys on the ps4 etc.. Other than that then i have alot of knowledge in various other fields aswell, but i thought id focus on stuff related to gamin here.

Any experience streaming/video editing/competitive play? I run a small Youtube channel myself, used to do some wallclimbing montages and stuff back in the oldschool Wow TBC days..

Nowadays i still have a youtube, but mainly use it for TV shows and small local stuff in my country.. Ive worked with C4d in the past, camtasia used to be my main tool to just record screen and do minor quick edits.

Current Favorite Games: Paladins (Ripoff overwatch, but has a decent community), Minecraft, CS:GO

What can you bring to Skill? I can participate in competitions, streams etc.. frequently since I'm on

most of the time, and I'll usually be down to play with someone on a game of their choice :)

Any experience streaming/video editing/competitive play? Well, I recently started playing comp on CS:GO, not ranked yet, still have 2 wins to go, and on Paladins I used to play comp, and was a decently high level until I reset and forgot password :/, and I've streamed in the past, and have basic knowledge.

Don't mind too much whether am accepted or not, it'd just be cool to get a bit more involved around HF, meet some new people and have a good time ?

I'm Costello and on Steam or any other gaming platform I go by Caesar or Fuego. I've been gaming ever since I was 5, I used to play these weird maths games which was cool..I guess. I then evolved and found out about GTA SA by the age of 7, I was very lucky as my parents bought me a PS2 but not GTA SA. At 7 I owned a PS2 and Gamecube, 2 great consoles which I could go back and play for hours. This is where my love for gaming began. Right now, i'm 18 and I mainly play CS:GO, GTA and Last Man Standing [bootleg playersunknown]. Anyway, I got my PC 2 years ago and I paid for it myself as I got bored of consoles, I love mods. It's hard for me to tell you about myself gaming wise as I have a lot to say so I'll just say; Gaming for as long as I can remember, I'm nice ingame and do giveaways ingame.

Current Favorite Games:

Last Man Standing, Counter Strike Global Offensive, Grand Theft Auto 5, Tom Clancy's Splinter Cell Blacklist, Hitman and Dishonored. You can tell I'm a stealth kinda guy.

What can you bring to Skill?

I can bring knowledge and I can tell you what to buy and what not to buy on the discord and subforum. I can contribute a lot on the sub forum and the members by helping out all round with anything anyone needs gaming wise. -Also servers...lots of servers.

Any experience streaming/video editing/competitive play?

Eventually moved onto the PS2 and got hooked on a game called Scooby Doo: Night of 100 Frights and it was all downhill from there. Right now I'm focused on being the best CS:GO player I can (just hit The Global Elite 2 weeks ago for the first time :D). I'm also a big League of Legends player (ended season 6 platinum 3 with a 60% winrate last season).[/b][[/color]

Current Favorite Games: CS:GO, League of Legends, PLAYER UNKNOWN'S Battlegrounds

Throwback Favorite Games: Halo 3, Gears of War Series (don't even get me started on how much I love this series), and Mario Party for sure.

What can you bring to Skill? I have some experience playing competitive and being a high ranked player in both LoL and CS:GO. I think my skill in these games could be helpful to the group. I'd also like to think I'm a friendly and active person when it comes to groups..

Any experience streaming/video editing/competitive play? I've done a little bit of everything. Used to make videos, streamed for a short period of time, and played sort of competitive. Back in the Black Ops 2 days, I would have considered myself a "semi-pro". I used to play a lot of league play and was ranked up in high master league playing with a lot of pros, semi-pros, and other great players. I played for a bunch of teams online but that's really all that ever came of that.

League of Legends is one of the main games I really love. I love playing League, and learning more and more about it. But League isn't the only game I can enjoy myself on; I love classic games like DOOM and TLoZ (can't wait to play the new one). I've also been doing Graphic Design for about 4 years, I sell that on other forums, and I hope to bring my service here on HF eventually <3

Current Favorite Games: League of Legends,osu!, Terraria, CS:GO, Devil Daggers, The Binding of Isaac: Rebirth, WoW, TERA etc etc etc. There's lots.

What can you bring to Skill? A casual, yet competitive gamer, if that makes sense (I don't play pro, but I'm super competitive). I love improvement in all areas of gaming, from the gaming peripherals and my setup, to my skill in each and every game. I love to beat my set records.

Any experience streaming/video editing/competitive play? Streaming sort of, video editing vaguely, and competitive play yes. I used to play 1v1's in CS:GO for money. Not much, but it was fun.

I am extremely competitive when it comes to gaming.

Current Favorite Games: Black Ops 3, Battlefield 1, Rainbow 6 Siege

What can you bring to Skill? I don't see a lot of xbox players on here and I would love to bring that to skill, as a strictly console gamer I could bring some views on things others who are only on pc don't always deal with or recognize. I could also help with events on consoles.

Any experience streaming/video editing/competitive play?I played call of duty ghosts extremely competitively back when the game was in it's prime.

Tell us a little about yourself: I am a college biology major pursuing pre med, so I dont have time

anymore for high skill competitive teams in CSGO. However I still find time to play a few matches almost every day just for fun. A lot of my irl friends recently got super into playerunknowns battlegrounds and I REALLY want to play it with them so I am saving up for it right now... I also spent some time playing MMOs like ESO and OSRS. I even have some experience playing strategy games namely CNC Generals and CNC generals zero hour. I used to stream CSGO and I love to make youtube vids as well but my editing skills are sub par unfortunately.
But I love syncing the music to the frags!

Current Favorite Games: CSGO and soon to be Playerunknown's Battlegrounds as well

What can you bring to Skill? I love discussing gaming and playing with others. I am very funny in game and love to have a fun ass time, but I can also be serious if its competitive. I really enjoy playing games with others. I can also design really good looking ts3 servers

Any experience streaming/video editing/competitive play? I used to stream csgo while telling funny as fuck stories from my life. I had a pretty great cult following and got some sweet donations. That was years ago though. Great time I loved it. I also was a very competitive csgo player and played on several teams and accumulated over 4000 hours of gameplay

Gaming Platform(s): PC and Console (Xbox one)

Region: U.S

Tell us a little about yourself: Well to begin with, I'm 15 years of age, pretty young and mature for my age.

I've been playing games for a couple of years now, ever since my Cousin came back from Europe,

he's showed me countless games, the first being Minecraft, this was in 2012, and I was about 10 years old, I bought my account on April 12th, so it's about to be my 5th year anniversary with Minecraft soon. I took a break from PC gaming for a while and went to console gaming for about 2-3 years of my life. Then recently for about a year I've gotten back into PC gaming, used to play a lot of CS:GO, all I play now is CS:Source, and some other games here and there. Outside of my gaming life I love to go and hangout with a bunch of my friends outside, and recently I've been getting outside more since it's getting hotter and hotter by the day, since Summer is around the corner.

Current Favorite Games: I don't really have a favorite game, I enjoy playing all games, however, if I was to choose a few favorite games, I'd choose CS:Source, Rust, H1Z1, and GTA 5(Console)

What can you bring to Skill? I'm not sure what I could bring to a gaming group, I'm active, friendly, and willing to play with any member in this group, depends on the game since my Laptop can handle only a certain amount of things as of currently.

Any experience streaming/video editing/competitive play? I've done a bit of video editing, nothing to big since I've never really planned to upload a video on YouTube, just want to see what I could create with what I know, I'm not too bad, since I've only had about a years worth of experience with Sony Vegas. I've never been a streamer, don't really plan on becoming one anytime soon.

Tell us a little about yourself: I'm 17 years of age. Been playing video games since 2010. I remember picking up a gameboy when I was 12 years old to play Pokemon Red. I enjoy both causal and competitive gameplay. I currently help manage a few CS:S Servers with a community. The first actual PC game I got my hands on was Minecraft, then went to CS:S and CS:GO.

Current Favorite Games: CS:GO, CS:S, League of Legends, Rocket League.

What can you bring to Skill? Like I said, i currently manage a few CS servers for a gaming community, I could possibility help with any servers you guys are wanting if there are any.

Any experience streaming/video editing/competitive play? I have won Tickets a CS:GO Tournament @ The SSE Arena, Wembley. Had to play a ladder on faceit to win these, so I guess thats some competitive CS:GO Play.

Region: NA

Tell us a little about yourself: I have been playing video games since the age of about 13. I have always wanted to be on a professional gaming team but luckily I own one now. Kyoto eSports is my absolute passion and pastime and I am the founder, owner, and CEO of it. We currently are the #1 Tournament Host in America for Hearthstone and currently have 3 of the top 64 Hearthstone players in America. If you are more interested in this, I am glad to explain it all.
(twitter.com/Kyoto_esports)

Current Favorite Games:

Xbox 1: Battlefield 1 and Inside(haven't played more than 2 minutes but i love it already)

PC: Hearthstone

PS4: The Last of Us Remastered (OMG)

What can you bring to Skill? My company already hosts 5 HCT Hearthstone tournaments every week and is one of the big players in the Hearthstone community. We have a partnership with Activision Blizzard, Battlefy, and Aporia Customs. I can provide anything related to tournaments and what not to Hearthstone. (Once again contact me for more info)

Any experience streaming/video editing/competitive play? Once again, I have mass experience with all of these things. I used to cast for our company and play for our company but I am more busy on the business side now.

Gaming Platform(s): PS2, OG Xbox, Xbox 360, Xbox One, PC

Region: Northeastern USA

Tell us a little about yourself: I've been gaming for the better part of my life, since I was around 3. I've mostly been into FPS games, but I don't mind playing others.

Current Favorite Games: Halo MCC, GTA V, CS:GO (Pretty garbage tbh - just built my first PC to game on it), Scarface: The World Is Yours (OG Xbox), and I'm looking forward to the release of the Friday the 13th game as well.

What can you bring to Skill? I'm hella fun to game with and I'm pretty good at most FPS games. I can become godlike on most games I play within a month or two, excluding PC for now - it's too big an adjustment for me to rise in skill that fast.

Any experience streaming/video editing/competitive play? I have competitive experience, mostly on Halo CE and Halo 3, and I used to play GB 2s back on Mw3 and Black Ops 2. I'm also interested in learning how to edit videos, I'd like to start a small channel showcasing some competitive play in the near future.

Gaming Platform(s): PS4 and PC once I get a new laptop

Region: USA east coast

Tell us a little about yourself: I have been gaming since NES till now. I also do PC gaming. I have done some competitive gaming for PC and PS3 and 4. Nothing pro, amateur I guess you could call it. I am getting ready to make a YouTube channel as well as twitch and get that going. I love FPS TPS and MMO games. I've been playing wow since vanilla.

Current Favorite Games: WoW, Mafia3, WWE16

What can you bring to Skill? I have been playing games for a long time and I work well with groups of people while gaming. When were all on chat and working it all out we can be unbeatable. Also I am laid back and collected so I don't get pissed over games.

Any experience streaming/video editing/competitive play? I have only streamed 2 or 3 times. I have done video editing before and I have the adobe creative suite. I have done competitive play for a variety of games on both console and PC.

I know my account is new but I am gonna be here for a long time.

Tell us a little about yourself: I am 18 years old, graduating high school within the next month~. Going to have a ton of free time until I start college around august. I work but have a lot of time to play at night.

Current Favorite Games: NBA 2K17, Smite, Forza Horizon 3, Madden 17

What can you bring to Skill? I can bring a gamer who loves to have fun but can also be competitive (mainly in sports games such as 2k or madden). I love a challenge, I don't consider myself the best player of anything but I always try to improve my strengths in certain areas I am lacking in to better

my skill in each game I play.

Any experience streaming/video editing/competitive play? Not really, never got into any of that. Streamed a few pack openings on twitch but no commentary or anything.

I'm 18 soon to be 19 years old and live in Sweden. Ever since I was a little kid I've always been a Playstation guy, I never believed in PC. One day a friend of mine got a Laptop and I was glued to it

for like the whole day, the only thing we did was to play like the Windows games lmao. Ever since then I've preferred PC over any other console, but still play like FIFA and other games on the PS4.

Current Favorite Games:

FIFA, GTA, BO1, Rocket League, and pretty much any realistic simulation game.

What can you bring to Skill?

I love to discuss and talk about anything game related, I play a lot of games so I think I can contribute with my thoughts, experience, and opinion that are game related. I'm also very graphics interested, although it doesn't have much to do with games.

Tell us a little about yourself

I've loved games since I was a little kid. I remember the first time I went out and bought a car racing game with my mom for my pc and it ended up running at like 3fps because of how crap my computer was but I thought it was the disk and would spend hours on end cleaning it and trying again. Lool I've come a long way but games to me seriously are a lot. I have a social life and all but honestly nothing takes stress off like a nice matchup or a tight game etc. To me games are like a gateway to having fun with my brain.

Current Favorite Games: Overwatch, CS:GO, Halo, BF4, Runescape

What can you bring to Skill?

I will be able to bring a whole lot of variety to Skill. The majority of my HF career has revolved around gaming. I have around 4k worth of my posts in the gaming section all from my pure passion and love for gaming. I am very competitive and work very well with teammates. I am a teamplayer and always put a team play before my own KDR etc. I also rely on and give crucial information in game and require teammates that can do so which is why skill would be a great opportunity for me.

Any experience streaming/video editing/competitive play?

I have had a whole lot of experience with After Effects and am capable of making really nice clean edits. I work with many plugins such as twixtor, motion blur and of course I have plenty of experience with Adobe's awesome in house plugins. Video making is no problem for me especially if you are looking for a high quality clip.

I have achieved many milestones in the many games I have played and being competitive is the reason why I play games. I always have to have a competitive sense within the game because it's what makes me stay up late nights practicing in lobbies.

As for streaming I can definitely help out with this. I got a full setup and a sweet blue yeti mic plus my English is legit af so I can definitely commentate things out and more.

PC, PS4 and Andoid. Mainly PC and I'm on 15+ hours a day.

Region:

United Kindom.

Tell us a little about yourself:

I'm Costello and on Steam or any other gaming platform I go by Caesar or Fuego. I've been gaming ever since I was 5, I used to play these weird maths games which was cool..I guess. I then evolved and found out about GTA SA by the age of 7, I was very lucky as my parents bought me a PS2 but not GTA SA. At 7 I owned a PS2 and Gamecube, 2 great consoles which I could go back and play for hours. This is where my love for gaming began. Right now, i'm 18 and I mainly play CS:GO, GTA and Last Man Standing [bootleg playersunknown]. Anyway, I got my PC 2 years ago and I paid for it myself as I got bored of consoles, I love mods. It's hard for me to tell you about myself gaming wise as I have a lot to say so I'll just say; Gaming for as long as I can remember, I'm nice ingame and do giveaways ingame.

Current Favorite Games:

Last Man Standing, Counter Strike Global Offensive, Grand Theft Auto 5, Tom Clancy's Splinter Cell Blacklist, Hitman and Dishonored. You can tell I'm a stealth kinda guy.

What can you bring to Skill?

I can bring knowledge and I can tell you what to buy and what not to buy on the discord and subforum. I can contribute a lot on the sub forum and the members by helping out all round with anything anyone needs gaming wise. -Also servers...lots of servers.

Any experience streaming/video editing/competitive play?

I have streaming experience but I stopped due to being busy. I have a lot of editing experience and I'm rendering a video as I type this. I also have a vast amount of knowledge and experience in comp play, mainly in CS:GO Cevo//Facelt//MM and LANs.

I hope you consider my RE-application and I hope to hear back from you and get accepted soon. Thank you for taking the time out of your day to read this and goodnight!

Currently Played Games:

I play alot of diffrent games currently. I play alot of Ghost Recon Wildlands, FIFA 17, GTA V, BO1, Rocket League, and pretty much any realistic simulation game.

I've had moments where I get bored of both FIFA and GTA which makes me just switch around between those three games. I play modded GTA Multiplayer aswell.

I used to play alot of Cities Skylines, Gmod etc.

I also used to play some diffrent IOS games but not anymore unfortunately.

What can you bring to Skill?

I am very interested and active in the gaming scene, so I would be able to participate in discussions and answer any kind of gaming related questions.

I could also help anyone who needs any kind of money/RP on GTA I would be able to give them it for free, since there's a lot of people who charge for this.

I also want to make the Skill discord more active, and have a bigger purpose, a great "lounge" for gamers to take part of. The activity on the Discord isn't the best which I hope to be able to improve!

Why do you want to join Skill?

I'd love to find a place where dedicated gamers belong, where I can talk and discuss gaming related discussion with passionate gamers.

I already love the Skill Discord, although it could be better activity from the Skill users themselves which I hope to be able to help with myself as a member of Skill.

Currently Played Games:

Runescape mostly. On Xbox I play mostly FPS games such as Battlefield or COD. Older COD's are my favourites. I only really enjoy gaming when I have people to play with, in which case I'll try out new games etc. Without a group of people to play with I end up stuck playing the old games alone which is why I don't have a very diverse game collection!

What can you bring to Skill?

Well, I've been active in the Runescape section on here for years. Creating guides and threads to help members and play the game together. This would have spanned over to console however I often found it difficult to find people genuinely interested in playing together. One thing you can always expect from me is quality. I treat people how I like to be treated and have a natural willingness to cooperate with others and have a generally good time.

Why do you want to join Skill?

My three interests in life are computer security, cars and gaming. As it happens, I'm here on the HF, so that takes care of security. Also I've been approved to join Torque, which has been great since I now have space to talk with others about cars. If I were to be accepted in to Skill then I would now have all three of my interests covered here on the same forum, which would set me up pretty good to be able to spread out my interests evenly amongst the forum as a whole.

Gaming Platform(s):

Ps4 and PC. I will always have a special passion for pc gaming though. Although, I will still hop on the ps4, occasionally to play with other group members or family/friends.

Region:

I am from the East Coast in the United States. I am located in the Central time zone.

Currently Played Games:

Battlefield One, GTA V, Runescape, some various steam games, and sometimes WoW. My true passion is for Runescape though, mainly osrs. I'm on almost everyday playing with fellow group members. I involve myself in helping others in the HFChat friend's chat. I also love training with others. I am training everyday, and have some pretty decent stats.

What can you bring to Skill?

I can bring OSRS giveaways back to the community whether that be in the group or labeled under the group in a giveaway section. I can help others with various different games. I can bring a friendly, but competitive atmosphere amongst group members.

Why do you want to join Skill?

I'm mainly looking for more groups to branch out and gain more friendships. I have made plenty in my short time back on OSRS. (Faulkner, Shutdown, Windows RT, etc.) They have been influential in my staying on OSRS, and they are all fellow group members. I've helped Windows RT restart OSRS with a little cash to start off, and I've pointed others in the right direction with tasks, quests, or skills. With that being said, I'm just a very helpful, friendly person who's looking to gain more friendships, and learn more about the games I play and keep on enjoying them.

Thank you for your time

What can you bring to Skill? I feel like I can bring a lot of tips and tricks to the group maybe some helpful information to get people through story lines in games. I enjoy posting and I'm online a lot so I'm able to be a functioning member of the sub-forum.

Why do you want to join Skill? I want to join Skill because I'm looking for some people to game with, see opposing views on games and play styles, and learn from people as well as teach people. I really enjoy gaming and have all my life and I feel like this group would be the best fit for me for that criteria:).

Slimy - May 4, 2017, 9:15 am

Gaming Platform(s): PC

Region: United Kingdom

Currently Played Games: I currently play Counter-Strike: Global Offensive, League of Legends and Overwatch. These are the main games I play both casually with friends and competitively.

What can you bring to Skill?

For Skill, I can bring a committed and dedicated user who has the same passion for gaming as you. I would be a fun and easily approachable member within the group, who is always up for playing games together with other Skill members. This in addition to being an active and lively member within threads and posts. I can contribute and share my thoughts and ideas to the group and topics - whether it be about gaming or not. I always have my contribution to add!

I also have my eagerness and competitive nature to bring along to your group! I am always up for playing games with other members, and can have a serious - but fun - attitude for competitive matches or games. For example: Playing ranked matches in LoL, or Competitives / Pick Up Games in CS:GO. My aim is to win, but losses are inevitable. I take my losses, and reflect on them. What did I do wrong? Was that a bad choice or decision? By reflecting on my games, it helps me improve and become a better player as I evaluate, justify and learn from my mistakes.

I also have a huge amount of in-depth knowledge for the game Counter-Strike: Global Offensive. I feel like I can share this information to help other people understand and get better at CS:GO.

To conclude: I would be an active, participating member within all Skill threads as I love to contribute my (gaming) thoughts, ideas and opinions. I thoroughly enjoy playing games casually and competitively, solo and within groups/teams. This is because of my deep passion for gaming and the gaming community.

Why do you want to join Skill?

I want to be a part of the infamous Skill group because it has been around for a very long time. It is a reputable group and brand within HackForums. Being involved within this group would be great as I would be around other members who have the same interests as me - which is of course, gaming. As I have said, I would be an active poster within our group, as I love contributing! Especially when the topic is gaming related!

Furthermore, I hope to find people who have the same devotion to gaming as me. I have full

confidence that I will, and can play games together with the other Skill members. I want to hold the Skill banner high and proud, to show the members of HackForums my commitment to both the group and gaming itself.

What can you bring to Skill?

I can personally bring in a background from a verity of different games on both a casual and competitive front. I've done both and been a casual gamer for years now. I have great knowledge in the gaming industry as well as in games development due to studying a course at college. I would be more than happy to create threads and release them on HF related to gaming. Furthermore I would be happy to do it within the group forum as well as host tournaments for money prizes.

Why do you want to join Skill?

Hack Forums needs a gaming group, one which is mixed with a verity of individuals who all work to the same goal; having fun and a good time. I would love to discuss with like minded people about such a massive industry and perhaps even work on the development of some mini games from the group for the community.

Honestly, I just want to join a community with similar interests as me. I'm actively looking for a community that would accept me and play games with me. Its coming into summer and I want to make some new friends to game with. I also want to learn more about certain games that I don't know a lot about. And mainly, to have fun.

when will the recruitment be over ?

HARDSTYL? - May 11, 2017, 6:53 pm

Gaming Platform(s): Xbox One and PC. PC is what I use the most nowadays!

Region:

United States. EST

Currently Played Games:

The game I play the most is H1Z1.

Currently addicted as hell playing 100 hour weeks.

I also find myself creeping back into OSRS. That game is like heroin.

What can you bring to Skill?

I have been playing video games since I was a little shit. I like to play competitively. Ya know boostin to get those 50s in H3! I'm pretty sure we have played h3 together starstruck. I also play Runescape and was a top skiller at one point.

Why do you want to join Skill?

I really want to join skill! I'm new to PC gaming and lack homies to play with. Really want to meet up with some H1 players from HF.

WinzR - May 11, 2017, 7:54 pm

Gaming Platform(s):

PC & Mobile

Region:

NA

Currently Played Games:

Overwatch, PLAYERBATTLEGROUNDS, Clash Royal, CSGO

What can you bring to Skill?

I am a good carry on CSGO, and Overwatch. I am also very active in the community. I am able to provide tips that will help improve game play.

Why do you want to join Skill?

I am looking for a group of friends who share the same interests.

False King - May 11, 2017, 11:20 pm

Gaming Platform(s): PC

Region: GMT +1 (The Netherlands)

Currently Played Games: PLAYERUNKNOWN'S BATTLEGROUNDS, League of Legends, Call of Duty: Black Ops III, Assassin's Creed Series, Battlefield 1, Ghost Recon: Wildlands

What can you bring to Skill? A singleplayer storyline enthusiast. I love gaming, but I love great stories within games even more. I often go in-depth, researching as much as possible when playing a campaign that has a great story. Though, I don't only enjoy singleplayer games as you can see under my Current Played Games. As for multiplayer games, I can bring a laidback guy who can play both competitive (decently) and just for fun, not having a care in the world.

Why do you want to join Skill? I love gaming, but having people to play them with or discuss great games with is even better.

Gaming Platform(s): PC, and XBOX ONE occasionally

Region: United States

Currently Played Games: Counter Strike, NBA 2k17 (xb1), Fallout 4, Skyrim, I also have ARK Survival Evolved.

What can you bring to Skill? I love talking to other people and playing games with others. I can also help people rank up in games that I have played before, and I know how to take a joke unlike many others.

Why do you want to join Skill? Skill seems like a very fun group, and some of the first people I have met on HF are from skill (@copywriter). Also, summer is coming and I need some people that I can play CS:GO with :)

Good luck to anyone looking to join :)

Mostly play FPS and Racing games.

What can you bring to Skill?

Help and support to other gamers also I got a few OG Xbox clubs if any members want to be apart of them

and if there is any team competitions I would gladly join and help.

Why do you want to join Skill?

I would like to join Skill because, I mostly spend my spare time playing video games and it would be nice to group up with people

and complete challenges and achievements together or even compete with each other I am sure it would be allot of fun.

Currently Played Games: OSRS, CSGO, LoL, Fallout: New Vegas, Fallout 3, Oblivion, CoD WaW, MW2, BO1, Halo 3, PUBG

What can you bring to Skill? I love playing games with new people, and I make YouTube videos. I can collab with any other YouTubers in the group on some videos, and help people grow. I am also online pretty often and always down to play any of the games I listed. I hang out in discord all the time and would be in the voice channels pretty often.

Why do you want to join Skill? I want to join skill so I have a group of people I can go to when I need someone to play some games with. I play at early hours of the morning fairly often, and none of my friends are on at those times. Having a group like this I can hit up and find some people would be nice.

hopeforme - May 14, 2017, 11:25 pm

Gaming Platform(s): PC

Region: Asia

Currently Played Games: Mirror's Edge Catalyst, League of Legends, Tom Clancy's Rainbow Six Siege, Watchdogs 2

What can you bring to Skill? I'm a fun-loving person who has been playing games for the entirety of my life. In the past, I was competitive as I had more time, playing Competitive Pokemon and being one of the top players. But nowadays, as I'm older, I spend more time in learning real life skills and educating myself, for example in Computer-related subjects on HF. But I still play games :D

Why do you want to join Skill? I believe that HF has many good communities and as I like games as well, it'll be interesting to be part of a group so that I can play games with like-minded people. Some games get significantly more fun when playing with others and using their multiplayer feature! Skill sounds like a place where I can join fun multiplayer games and events and have a lot of fun. I'd also like to interact with a great community too.
