Thread: [How to create a semi Undetectable Keylogger! \[Video Tutorial\]](#)

Frosty07 - March 23, 2017, 1:26 am

Hello fellow users!

In this video I will show you how you can create a keylogger (with the help of a program) and make it semi undetectable.

What do I mean by "semi undetectable"?
Watch from 8:00 as I explain my point.

I hope you guys will enjoy this!

If you have any questions, please comment :)

To give credit, I've included this method in my video:

Sector C - March 24, 2017, 1:24 pm

So I followed all the steps in the video, everything is working fine except that the log's I'm receiving in my gmail are blank. The test emails are fine but the actual logs have nothing in them.

Yeah, I noticed that. I'll either do the video again (lol) or just giveaway another keylogger.

Try Costex Logger, it's pretty good but it doesn't have stealers
