Thread: [How to create a semi Undetectable Keylogger! \[Video Tutorial\]](#)

Frosty07 - March 23, 2017, 1:27 am

Hello fellow users!

In this video I will show you how you can create a keylogger (with the help of a program) and make it semi undetectable.

What do I mean by "semi undetectable"?
Watch from 8:00 as I explain my point.

I hope you guys will enjoy this!

Link to the video: <https://www.youtube.com/watch?v=mAnUM4p4HG8>

If you have any questions, please comment :)

To give credit, I've included this method in my video:
<https://hackforums.net/showthread.php?tid=4757158>

-EXP0SED- - March 23, 2017, 1:46 pm

Looks good dude thankyou, will be giving this a whirl

Zero - March 23, 2017, 1:48 pm

Will give this a shot later ;)

Thanks :)

Marwix - March 23, 2017, 2:32 pm

Not a bad tutorial actually.

I like how easy it is. Good job!

Would you be interested in making a tutorial for jLog perhaps? Lmk!

Frosty07 - March 24, 2017, 1:42 pm

I'd be very interested :)

Redblock - March 26, 2017, 12:08 pm
Thanks mate, i will watch that

Elpatii - March 27, 2017, 4:42 am
I will watch that too, thanks!

microapp - March 27, 2017, 6:10 am
Lol Its working thanks for the keylogger

testerics - April 18, 2017, 5:51 am
Tried on test machine. Not working on Windows 10..

TheTechBeast - April 18, 2017, 6:24 am
Is it possible to once set up put on USB move to another computer drag and drop

Frosty07 - April 18, 2017, 7:20 am
(Apr 18, 2017 05:51 AM)testerics Wrote: [\[CITE\]](#) Tried on test machine. Not working on Windows 10..
Can you write down what you've exactly done?

I tried the keylogger I provided and smtp delivery still works.

You can always try using a different keylogger.

(Apr 18, 2017 06:24 AM)TheTechBeast Wrote: [\[CITE\]](#) Is it possible to once set up put on USB move to another computer drag and drop

Yes, but you manually have to drag, drop and run the keylogger (unless you have a usb spreader that works) and make sure you put it in a hidden directory ;) .

I will be trying this out later

lvminia - May 12, 2017, 2:35 pm
Thanks for sharing ! :) I'll try it soon

Bigvloei - May 13, 2017, 8:27 am

Thanks, will deffinetly try it out

212. - May 14, 2017, 2:49 pm

Hi is this keylogger safe? will it bite me in the arse?

ps. nice video

sulaiman - May 15, 2017, 1:29 pm

can you explain for what is this please ... i didn't get the point ,, thanks.

Mr.Who - May 16, 2017, 7:36 am

Thanks Man , i needed this ! ;)

ps. nice video

You never know, I'll try to take a look at the code if possible.

Just don't use your main gmail account or OS. Set up a VM and a new gmail account and you should be fine.

A keylogger could be used for various reasons. If you had actually watched the video provided you would've seen that he got all kinds of information from the victim. IE, his steamkeys usernames passwords and other information.

A keylogger is mainly used to steal information without the victim being aware.

ps. nice video

The keylogger is a bit old but works just fine and I guarantee it won't bite you haha

Thank you :)

Can anyone assist me updates my personal key-logger, the builder for that has been inactive for a while and i need someone to update some of the few features for me, ofc, i will pay for the service

alexander82 - May 22, 2017, 12:22 pm

I will watch this later, look great

Bambisquad - May 22, 2017, 6:13 pm

em..used a new gmail account which was later reported to be accessed form another country. odd... too coincidental for me to pass up.

Frosty07 - May 24, 2017, 3:05 pm

Try using j-Log. It's pretty solid.

That's how SMTP works, the keylogger "logins in" to your sending email you provided (in the creator) and delivers the logs to your receiver mail. If you spread your keylogger to different countries (or computers using vpn etc.), you may get "access from different countries" warnings from gmail.
