So I'm giving you a method how you can call someone/anyone with any number you like with the countrys listed, you can even use there own number to call tham, ive been using this for months now from when I found it out, sometime last year, after teaching some of my close friends, and they liked it so much they still use it to this day.

This is simply a method on how to call someone with any number you'd like,

30 seconds To Set Up The Method & This Method Covers, US, Indian, Puerto Rican, or Canadian cell phone or land line!

This spoofing method I'm making private in around 7days as I don't want many people knowing and make in saturated, so get it while you can guys!

By any chance does it works in Panamá?

RepForums - March 24, 2017, 2:38 pm

The numbers allowed are on the thread ATM and new 1s will be updated and shared, but for now its the 1s on the list, which are great, this method not only shows you how to spoof your number but also how to stay anonymous while doing it, thanks for the 4/5 people who got it last night and people who still thinking about it, just thinks theirs new area codes and country's opening every week, thanks guys!

Does this work in the UK?

Also, is it free to spoof/create a spoofed call?

Why you capitalising your letters?

Kind of unprofessional as it's coming across that you were 'angry' from me asking that question.

NOT INTERESTED ANYMORE, Thanks

Mustys - March 27, 2017, 9:16 am

I would love to receive this!

Thank you!

I had it capital as I was using them in a convo before, not because of a question you asked, I'm always respectful and I told you everything you needed to know, in my reply and np man good luck for future ?
