THIS SERVICE IS FREE OF CHARGE!

Old sales thread: <https://hackforums.net/showthread.php?tid=5580130>

About

Looking for computer clean-up but don't want to clean it yourself? I can clean it. Free. This service is offered by Notorious completely free of charge. Just remember the great group that tries to make strides in making our community better by helping each other anyway possible. How it works? I remote into your computer and clean it up using various free cleanup tools. Just incase the tools don't get everything, I use my experience cleaning computers IRL for people and put it to use finding those pesky adware and malware issues that tools don't get.

FAQ

Spoiler [\(Click to View\)](#) Q: Are you going to infect my computer? A: No. (Just incase someone asks...) Q: How will you connect to my computer? A: I will use TeamViewer. Its free and safe. As far as I'm aware, its one of the best Remote Support tools. Q: Are you indian? A: American Indian but no I won't sound like an indian if you want phone support. Q: How do I get this service? A: You contact me with one of the methods of contacts listed and tell me the best time for you to work on your machine. Please include your timezone. Q: How long will this take? A: Honestly, that could vary from a few minutes to a few days. It honestly depends on how badly infected your computer is and if the hardware + internet connection limits the rate of cleanup. I'd say plan for at least 4 hours. Q: Can I make a test machine and load it up with malware and test you? A: Yes but please keep in mind that others might be waiting for support. Please let me know if you want to test my l33t skillz.

Terms of Service

Spoiler [\(Click to View\)](#)? You must agree to a set time period prior to me starting the cleanup. If you do not have enough time, we can reschedule.

? I will not be responsible for any missing files or data. i would recommend ensuring you have backups of your data.

? All tools I use will be downloaded using your own computer. This ensures that there is no file tampering prior. In the situation where you have an infection preventing downloads of the programs, only then will I transfer the files from my own computer to yours.

? Don't let me see anything I shouldn't. This might sound strange but I will be accessing your computer. I don't know you personally so I wouldn't want to see you in your birthday suit. Please

ensure that any photos or documents displaying your glory are either in a zipped folder or have been removed.

? Ask me questions. If you are unsure of what I'm doing or concerned with what I'm doing, let me know. I don't want to freak you out. I'll stop and discuss whatever is bothering you.

? By requesting my services, you agree to allow all remote sessions to be recorded by me. These sessions are to protect me against any possible false scam reports.

? If you have any type of viruses or malware you wish to keep, such as a remote administration tool for your personal servers etc, be sure to remove it or back up the files. This will be useful in the event that a tool removes your software when being detected as a virus itself.

Vouches

(Mar 22, 2017 10:46 AM)Fucci Wrote: [\[CITE\]](#) I can vouch for the legitimacy of this service. Leroy knows what he's doing.

He's helped me countless times with small projects and dropped me some knowledge that I didn't know I needed!

VOUCH!

(Mar 22, 2017 04:34 PM)Anointed Wrote: [\[CITE\]](#) Vouch for Leroy! I got the last vouch copy and he checked my laptop out for me! Didn't find anything, so that's good. ?

(Mar 22, 2017 06:54 PM)Shrek Is Life Wrote: [\[CITE\]](#) I received a vouch copy of his service and I have to say he definitely knows what he's doing. I'd say it took about an hour or so to thoroughly check my computer and find any pesty viruses. Overall great service, I could see people really taking advantage of his service, especially only for \$10. He also downloaded tools that can help prevent any malicious activity in the future. I'm extremely satisfied with the results and I would highly recommended to anyone who is riddled with viruses or just looking for a check up. Also, he's a very chill guy to talk to and have a conversation with while waiting for stuff to scan.

This is a wonderful help desk, good job!

Red Hood - March 28, 2017, 5:45 am

I wish you had made the offer literally two days before you posted ;(a buddy of mine had something nasty. I appreciate the free service offer, if I ever need my computer cleaned I'll be coming here.

James Burnham - March 28, 2017, 5:49 am

Impressive. A great contribution.

Soulmate~?? - March 29, 2017, 4:36 pm

Good that you decided to make it a free service, hopefully some people will take advantage of it and write reviews. I am not sure how likely someone who is new to the forums and is infected would trust it.

I've had a few people take advantage of my service when it was paid but they got the vouch copies. I'm now offering it as a free service in the name of Notorious! As for any new members that aren't sure of me being legit or not, its worth a try at least lol. I record all sessions to ensure both mine and the person I am helpings security and safety.

What tools are you using? Also threads like these offering cleanup services usually die within some months.

You can get most of the tools I use from Bleepingcomputer.com. If it dies then it dies. I still have people wanting to get their computers cleaned still. So not dead yet! lol.

I think I need that service. My internet became slow and I am not sure if it is windows 10 updates that cause that.

It will be in a few days or so before I will be able to get to you. Currently I have no internet. Just my hotspot and I only have 1GB.

Can u fix files being ecrypted by cryptoware?

Leroy Jethro Gibbs - April 19, 2017, 6:57 am

(Apr 19, 2017 06:52 AM)Conscientious Wrote: [\[CITE\]](#) Can u fix files being ecrypted by cryptoware? Depends on the ransomware that caused the encrypted files. I'd suggest looking at bleepingcomputer.com. See if the same ware that crypted your files has had a decrypter created for it.
