Thread: [Recently discovered how broken meta is](#)

Qratix - March 23, 2017, 3:22 pm

So i've been playing league for a good while and I always considered meta like bullshit or I didnt mind playing stuff that is "meta" but now I know forsure that this is broken. Like i checked the winratio on some champions, played a few graves games because he was high winratio and its just demolishing. I dont only win but i actually am really strong the entire game!

EDIT: I lost my queue for typing this, rip 5 min timer

Well I guess there is a reason to why Graves has a 75% ban rate.

Meta is fine and all but I don't like to rely on the meta to win games.

I played a wukong game yesterday and i was hyper fed and far ahead, but i could still not oneshot unless i ulted for a while. But if i was playing graves forexample i would been able to kill them straight away

I'd rather play champions I enjoy instead of meta champions. :)

The current meta is good for the most part, except for Graves. Abuse him while you can.
