for a game? what do you think?

?nder - March 24, 2017, 10:24 am

Nier and Drakengard 3 both have great soundtracks. Legend of Zelda is probably more recognizable though.

Final Fantasy XIV, Metal Gear Rising, The Witcher 3 (especially Gaunter O'Dimms theme), Ocarina of Time, Majora's Mask, Donkey Kong Country, F-Zero, Thunder Force IV, and Re-Volt come to mind.

Metal Gear Rising is the only game I can think of where the sound design makes the game way more enjoyable than it has any right to be.

Also love Duke Nukem 2's soundtrack. Probably my favorite from any DOS game.

bloff - April 3, 2017, 2:09 am

I like the soundtrack from diablo 2. Tristram and rogue camp tracks are the best ones.
