Leaving the logo there is not credit.

Do you not get it? I made this and I'm seeing the source somewhere else with old my logo on it.
What do you think I'm thinking right now?

you are over reacting
its open source and hundreds of copies are every where with no credit if yours
I was nice enough to leave the logo unlike most who claim as their own,
so chill out and be happy some one was inspired enough to release source and
faster version of it

u just copied his source.

You are acting like an idiot:

"ye i stole your code with no credits!!1111"

"o wait the logo is there thats credit!"

Its not fucking credit if VmX5 wouldn't replay here no one would know that he owns it.

You are also acting like an asshole thinking that you are Jesus for leaving an icon.

ffs you definitely deserve my neutral which I almost never give.
