If you think a regulated synthetic drug is made the same way with the same chemicals as one off the street you're an idiot.

So what? Let people experiment with what they want. Weed is easy to get and easy to identify provided you have some experience. If you're a moron and smoke the wrong stuff, the world isn't going to miss you.

No this is terrible. This is every bit a testament to big pharma being the sole blood thirsty competitor and oppressor it is to the miracle drug Cannabis. How are people so blind. Synthetic Cannabis has thus far given us no reason to believe it is any safer than Cannabis. In fact all evidence points to the contrary <https://spiceaddictionsupport.org/side-effects-of-spice-use/>

We actually have plenty of room for population.

I think we just need to stop breeding for like 5 years.
