Harden's 3DS Pokemon Gen Service

I thought I would give back to the community with something I can offer for free not sure how many people would even want this but for people who want to battle competitively this can help out. I'm not 100% up to dates whats allowed but I do know that the national dex is out and thought why not gen some pokemon up for competitive play. I can gen breeding dittos all the way to competitive pokemon. I am using PKSM for genning thank the lord for CFW

Pokemon: Sun/Moon (For now) If I get a lot of request I will do ORAS and X/Y

Status: Open

Rules:

I can only trade stuff that is tradeable (so cherish ball pokemon like mew aren't tradeable) and with legal items like not all the megastones are out there so keep note of that.

Make sure moves are legal!!!

I can refuse to gen for anyone that is being mean :P
