Thread: [Lost an Account to migration](#)

romanw - March 25, 2017, 7:33 pm

I haven't logged into MC for years, but I had one account I never migrated and one that I used the exact same email to make after the whole migration thing happened. I used to just login to one with its email and one with its username even though they were both associated with the same email address.

I can't seem to login to anything without using the email to the account though. Since it was used to make two accounts, is it possible my old account just glitched out of existence? I can't seem to find anyone else whose ever had this problem.

I'm not sure if I could even log back into it if I had the correct password. There's no recovery option because I can only use that for the migrated login.

Contact mojang with the email you used last on the account. Wait a week or 2 and they will send you a recovery code.
