Thread: [Instagram Private Account Viewer?](#)

Ritzey - March 26, 2017, 9:17 am

guys know any programs that can view private accounts? cause all the websites are a scam af

SXSW - March 26, 2017, 9:24 am

It's not possible at the moment

Charger - March 26, 2017, 10:11 am

Not possible.

No website will be able to do this unless they use an account that follows the user.

skeletor2525 - March 27, 2017, 11:34 am

Those sites are fake and scams. Just like some of these guys on here selling tools for a bruteforce attack on an instagram account. What they are not telling you is that instagram locks you out after a few failed attempts and it also asks for a verification code to use the account when you're trying to connect on a different IP address than what the account user has which is sent to their e-mail.

I don't think so I also searched on it but didn't find anything that works.

It isn't a thing yet and probably won't ever be a thing.

R3cidis - March 28, 2017, 12:48 am

It would be easier to just create an instagram account and request for a follow and hope they accept the request, because at this moment there are no programs or websites that can view private instagram accounts
