Thread: [Ultimate Free Guide To Making Money Online! || Novice || Advanced || Pro ||](#)

Ben Affleck - March 26, 2017, 12:59 pm

Hello, i'm Costello Falcone [pronounced Fal-Cone-E] and today I'm here to share just a few ways of making money online. This is for beginners who want to start earning online or for people who would like a side income and everyone and anyone can do these methods. They range from Whitehat to Greyhat. I'm making this guide to help you the reader if you are struggling financially or just want another source of income. I'd like to apologize in advance for bad grammar or spelling...it's 5:55 am as I'm writing this.

I will explain how much you can potentially earn with each method, then how to do the method, leading to some pros and cons and then ask you to leave questions below.

CPA/PDD

To begin we're starting off with CPA/PPD as your first online income. Now CPA/PPD can be automated and can you earn you anything from \$0.01 to \$1,000s a day if you can take really put time and money into CPA/PPD. To clarify you don't need money to start doing CPA/PDD but it can help when buying instagram accounts and proxies. You're probably a bit confused and i'm sorry so let me explain how you can start CPA/PPD. First of all what you want to do is sign up to [OGADS](#), [CPALead](#) or any other CPA/PPD websites and from there you will see your new home aka the homepage. Now you'll need to find a niche, create a couple of instagram accounts and generate your link so when people click on it and download/fill out a survey, you will recieve a small sum of money. Bots like followliker can automate this and earn you money while you sitback and relex. -At the end of this guide you will see a link to a full tutorial on how to do CPA/PPD.

Pros:

This can be automated so you can work on other projects. [E-whoring, websites, stocks].

There are a lot of resources like landing pages, cheap proxies and accounts online.

Incredibly profitable if done right & automated.

This is easy to do, anyone can do it.

Cons:

Accounts get banned frequently. [Insta, whatever you're using].

Proxies can fail.

You need to fill out a tax form so you have to be 18, 16 in some countries.

If not automated can be difficult.

E-whoring

E-whoring is something I did for a few months and earned thousands. With E-whoring you have the potential to make tens of thousands but to be honest you have to no sense of wrong doing. I stopped because I started to hate it. At first I loved it, I remember when I earned \$100 in a day and it was great but it's just not for me. I don't want to sit talk to men for hours, the problem with this is that it's luck no matter what anyone tells you. New sources of traffic helps and sugar daddies [pretty much impossible to find] will help. To go off topic very quickly I E-whored for 6 months and made around \$6,200 without the aid of a sugar daddy. To E-whore all you need is a bluestacks, kik, a E-whore pack and some social engineering skills. Once you have bluestacks download kik, go to a kikfinder site, post a few pictures from your E-whore pack and wait for the traffic to flood in. -There are many other methods you can use, this is what I like to call the snatchNgive method..snatch the money, give the pics N move on.

Pros

It's easy and anyone can do it.
Hardly any effort required.
You can make cash quick.
Extremely profitable.

Cons

Saturated. People will tell you it's not but there are more E-whoring communities out there than you think.
Days/Weeks without money. Dependant on your method you can go days or even weeks without money.
Morals. If you have have morals then I wouldn't recommend doing this, it will destroy you.
It's morally wrong and no matter how you look at it, it is scamming.
Your paypal can get limit and you can get IP Banned.

E-Commerce

E-commerce is the selling of products [virtual or physical] over the internet..services too. There's not much to say here to be completely honest because from that first sentence you can already tell it's extremely profitable as a lot of online stores are incredibly successful and don't have any physical stores, you can also tell it's not easy if you have a high amount of traffic and you have to deal with payments, sending the item, refunds, complaints,etc.. by yourself. E-commerce is a great thing to get into young or old if you can find the right product(s) to sell. Now I myself run two shopify stores so I must recommend starting off using shopify..I even heard a couple of members here earned themselves around \$50,000 which isn't that bad. To do E-commerce you have to have a plan, predictions, be ready for hiccups and be highly motivated [which means 99.9% less hackforums]. To begin get yourself an idea..got it? Now, enforce your idea and make sure you can fund it, if you can't fund it try and look for investors as I'm sure some people will want a slice of the cheddar you're going to be making. I'd recommend you use shopify personally but there are many many sites out there that you can use. Okay, so now your shop is set up and you have everything in your store all you have to do is advertise, SEO/rank and advertise so you can start to gain traffic. There is a much more detailed guide on this on the forum, so be sure to check that link out down below.

Pros:

Extremely easy once things get rolling.
Anyone, anywhere can do this.
Extremely profitable.

Cons:

Lack of motivation will seep into your shop.
Very time consuming as a side income.
Problems with refunds, etc.

Investment/Stocks

To end this E-guide on how to make money online i'll be talking about stocks and investments. Now if the other areas really aren't for you and this is what you're looking forward to as your future online income I recommend actually going over to the Investment/Stocks sub-forum as my knowledge on these two sectors isn't very strong. With investments you can invest in anything from Bitcoin to Gold to Oil and investing is dangerous and to invest I do feel like you should be doing a lot of research..this isn't really something I can see people doing on this side straight away. Now with stocks you can learn on simulators online like investitopia to get started I recommend you

do some research as stocks as they are quite hard to explain to some people and come back and use [this link](#) to try and trade [you get £100,000 to practice with and it's not a ref link].

Pros:

You can earn a lot of money if you're smart.

It can be fast money.

Anyone can do it.

Cons:

You can lose money even if you're smart.

It can be hard to start learning.

It can be incredibly stressful.

This was Costello Falcone and this thread was created to motivate and to show you that you don't need "secret methods" to earn good money online. Some of the best methods are free and they're staring you in the face. Money takes time to earn, if you're looking for short cuts you won't find them.. what's the rush anyway jheez.

Inspire, Innovate & Motivate.

"There are no secrets to success. It is the result of preparation, hard work, and learning from failure." -Colin.P

If I can improve this thread please tell me how, sorry it had to be so short there's 8000 word limit which I passed twice, haha. Also, I hope I helped no need to thank me just knowing a I made a change is good enough.

*The end quote is by Colin Powell, his name went over the word limit. Good Luck.

@Kevin - March 26, 2017, 1:02 pm

Awesome and informative post mate!

Although I don't experience the cons of the Investment/Stocks section it's a pretty solid post, good job.

Thank you sir! I appreciate it!

AMO1 - March 27, 2017, 10:37 am

Thought this would be a free strategy that can be implemented. I guess this info is still useful. thanks

for the share.
