No other scraper can even come close to these results or speed!

Scarlett Johansson - March 28, 2017, 7:47 pm

Fine me a proxy scraper that gathers more proxies and I'll find more sources.

This is a nice product and it works fine, but the fact that there is a giant ad smack-dab in the middle of the program is kinda unpleasant...

Kinda like you just put this out to promo other products

Well considering its for another service of mine I don't see an issue. Also considering my product is cheapest on the market, is extremely fast, and pulls in 10 times + the amount of most competitors such as Shadow Proxy I dont think its a big issue with our customers.

over 70% of these ip's scraped dont even ping, ... I mean what can i say you get what you pay for...

Its not ewven worth my time checking the entire list

Id stay clear of this product, 170k proxies in 2 alive.

The first entries of what it scraped at 0.0.0.0 Seems legit

Lesson Learnt: You get what you pay for and quantity never beats quality

Edit: Update 2 proxies working so far. I stop my checker now at 200k after removing 20k dupes

Nothing against op some of his products are decent

Had nothing against op, bought the product got a shit return

i never expected this kind of abuse as a customer... Good job op, if you didnt realise i actually sent customers to buy your other products but okay

First off I would like to thank you for bumping our thread. Much appreciated. Secondly, I I would like to thank you for purchasing our product which in returns helps us develop more applications <3.

Now to the main point... Would be so kind to link me the whole list of proxies you scrapped? It's programmatically impossible for there to be dubes. I been through the list multiple times with 0 dubes. Of course I am only human so mistakes are always possible.

Now to the topic of proxies scrapped. Most of the sources are from 2017 so the sources are fresh, but have you ever seen 1.3m working proxies? I have not, I have not even seen 10k working proxies where every single proxy was working. Using simple statistics, I can tell you that by scraping 1.3m proxies from fresh sources I have a much better chance to get a lot more working proxies than you

can with your 100k.

Please pm me or continue to bump our thread if you have any other questions. Typing on phone so I may wait this post a few times for spelling.

Wow man. I would love to see that 30k working proxies from 100k? You have to be sitting on some HQ shit. If you provide proof I will buy 100%. I am not joking, in my life I never seen 30k working public proxies.

Except a update this weekend. Improved stability and a few new features .

NewZealand - April 1, 2017, 8:36 pm

Code Changelog 4-1-2017

- *Added Quick Scrape which goes through ~100 HQ sources instead of 70k sources
- *Fixed bug that would let the program continue running even after being finished
- *Adjusted proxy scraping algorithm to increase proxy detection
- *Backend security updates
- *Updated Full Scrape source list. It is now able to scrape almost 3,000,000 proxies

Just liked I promised. If something is off people report it. I know a lot of people will really enjoy the quick scrape mode.

My internet connection is fine, I am connected to an Onion Router however I use a VPN over it, usually if a repo is blocking tor connections the VPN connection counters that issue.

I am running as an admin, correct.

I am also running from the same folder.

I have absolutely no antivirus/firewall installed.

100c/o guarantee that something is blocking the connection or a problem with the HWID generation. How about the default Windows firewall? Maybe it added a rule to not allow outgoing connections? How many hard drives you got installed?

I had the same setup since when I first bought the proxy scraper, it was not broke then so it should not be any different now.

Im sick of buying garbage, just pure time waste;

Yeah so what its \$2, but when the same fuckers keep relaunching the same shit proxy scraper twice a month it adds up. Now the 5th proxy scraper I have bought which has turned to shit within a month of purchase.

I highly recommend you do not purchase this trash, shit support. I guess this teaches me for being a lazy cunt, I have since just generate my own scraping list, pointless relying on other peoples garbage. Its a shame I paid with BTC or I would be charging back for the principle right now.

Multiple flaws in your statement.

1. This product has never been relaunched or re-released. Source code is all hand coded.
2. The program has physically not received any updates. The only thing that receives updates is the source list.
3. Since the program has not been updated since you bought it just means the issue is actually on your end and you should stop blaming others for your ignorance.

 - 1) I was not referring to YOU I was referring to the other people I have purchased scrapers off, it seems a common trend. Launch a scraper, sell lifetime licenses for as cheap as possible to as many people as possible. When the sales stop, abandon or sell the project.

2) When I see this screen;

Which we can both agree is your scraper, I assume there are updates being made. Regardless of what that update is, I called it an update because that is what it says.

3) How are you about to tell me that it was working fine, then a few weeks as coincidentally the seller is 'on holiday' it stops working. Right, must be me of course.

Your ignorance is the fact that you're paid to promote this product, you can see I patiently posted two notices stating I was having issues and did any of you respond to me? Did you fuck, so you got the true, meaningful vouch.

Quick update, its now magically started functioning. Im using the exact same setup as I was before, so it could not of been on my end to be honest..

Well we changed nothing on our end so it sounds like a user-error. I'm glad you got it working, I'd be appreciative if you could revise your review claiming my product does not work when in fact it does.

This is just a scraper, you'll need to run these proxies through a checker to get what you want. I offer no refunds as stated in the TOS.

Sources are updated often, its just a scraper bud of course all million proxies you get aren't going to be active, that's why you use a checker to check the proxies and get the working ones. Don't be a dumbass, thanks.

Are you serious? Obviously I have checked the proxies and I know that not every proxy is going to work, but the amount of working proxies is so little that it just doesn't feel like it's worth it. Also most of the websites your scraper is scraping off of (atleast in the full scrape) have old dates in the URLs so I doubt those pages will be updated.

Well if its not worth it to you, then maybe just go out and buy some pre scraped pre checked verified proxies? This is for people who don't mind spending the time and work to get them.
