Thread: [\[eBook\] Free Unlimited 1 Month Hosting \(Web & Cloud\)](#)

Scuti - March 28, 2017, 10:12 pm

Hi all, I have a very simple method that takes a matter of seconds to receive hosting servers (both web and cloud) that generally cost \$12 and \$15 for free! You can use my method to make unlimited servers, and can resell them for cheaper than usual and still make some hefty profit in bulk, or use them for your own benefit of course! I have never seen anyone else post about this, so I thought I would make it. This method is guaranteed to work or your full money for this eBook back! Please PM me for the Rocketr link (\$250), as I won't give this method to negative rep'd users. (to prevent leaking)

The entire eBook ownership is purchasable for anyone interested also for the right price.

Whoops, can an Admin please move this to the Ebook section? Thanks.
