You can see here my conversation with Amazon Support, and again lets go over teamviewer, on both accounts and lets find out if my prime are dirty?

Themis should pay for the service weather it caused the lock or no since he doesn't know that for sure yet.

That's what I'd do untill proven wrong by customer support.

i have dealt with only 2 people on that account, i am waiting for other person to come back online to see what is up with his giftcards, but i want to hear from amazon themselves what happend and whne i do i will have no problem refunding the person, i would've even gave him extra cash if he wasnt a moron

that might be your opinion on the matter but i am trying to call all day and will have it soon, thanks for sharing it anyway:)

The screenshots don't lie. Obviously it's a problem with your account, you should refund OP.

i still havent talked with the other party who sold me the agc, once i resolve it with him i will be more than happy to pay the op

jBoss - March 29, 2017, 8:50 am

But i dont have nothing to do with that deal... its not fair for me, waste time and money for something that is not my fault, what if the other guys knows he sold a carded/stolen giftcard and never comeback? (i dont know who is him, and i cant confirm that he is doing that, just trying to make a point here) im trying to fix what its apply to me...

(Mar 29, 2017 08:43 AM)Visual Freedom Wrote: [\[CITE\]](#) I am sure Themis will fix this. I just talked to him.

Hope it will, thanks for your concern!

Also im not looking for a refund, just for what is mine, i sold him \$33 on prime i need 23.1 on btc

Themis - March 29, 2017, 9:08 am

i refunded the op, spoke to the other party seems he sold me a chargebacked code!

jBoss - March 29, 2017, 9:12 am

Payment recieved going to close all this!
