Google is upcoming with new features and my favorite is "Customized Navigation Bar"

Features:

- #1. Notification Channels, Snooze Notifications and Badges
- #2. Navbar Customization .
- #3. Custom Lock Screen Shortcuts.
- #4. Battery Life Improvements
- #5. New Settings Page
- #6. Adaptive Icons
- #7. Ambient Display

Genuinely excited due to finally fixing wakelock issues with GPS constantly waking up phone all the time consuming battery etc. And other things.

Android always names their operating systems strange.

OT: Probably would never use any of that. Too complex for me.

After Alpha and Beta, they just used alphabetical order, and used the corresponding food as a code name, instead of having C, D, E; they had cupcake, donut, eclair.

So it went:

Alpha, Beta, Cupcake, Donut, Eclair, Froyo, Gingerbread, Honeycomb, Ice Cream Sandwich, Jelly Bean, KitKat, Lollipop, Marshmallow, Nougat

And the next one (as OP stated) will be Oreo

I like it :)
