Thread: [Steam multiply urls?](#)

Ri?dle - March 31, 2017, 8:49 pm

Anyone have / seen someone with alot of URLS (on one account)? I was fking around in python and I somehow have more than 1 (and can have as many as I want I believe)

Charger - March 31, 2017, 9:33 pm

The page is probably just cached.

Python wouldn't do that.

Python wouldn't do that.

This, an interpreter couldn't really change variables from the website.. in this case.

maybe gaben is a goof

What? python wouldnt do what? I was fucking w/ changing my custom URL via post request and it happened

<https://steamcommunity.com/id/01J>

<https://steamcommunity.com/id/Smeone113>

<https://steamcommunity.com/id/Sme56one/>

edit: I'm not saying that, i'm saying it most likely glitched due to what I was doing, and thus this happen ^
