Thread: [What else can I do?](#)

I just can't carry. I was mid Plat last season but I just can't carry and get out of this shitty elo, I just get cancerous players, always a cancerous bot lane or jungle.

It honestly feels like playing against bronze players, I always destroy my laner, try my best to steal enemy jungler and kill him + mid laner but THATS NEVER ENOUGH to carry.

Just what can I do to fucking win a game? My top laners are always getting fucking carried with scores like 0-5 2-5 yet here I am constantly winning lanes, doing more damage than mid laner + adc + tanking harder than anyone else and I just can't win a fucking game.

Sure.

Yet another game 11-6 or some shit similar and lose game because of 0-13 caitlyn.

Typical elo hell

You die quite a lot each game. Try to make early plays like invading enemy jungler or TP bot lane to get ahead.

I also like to try to get the first tower so you pressure your lane a lot and make room for your team to do something. But remember to stay SAFE ENOUGH. If you die and you are fed it's not worth it.. 9/10 your team does nothing.

if you always destroy your opponent laner you will win more than 50% of your games, fact.
