Why do you nerds even like anime. It looks weird and its dumb. Japanese is even that cool, you guys just have a fetish for them anime tiddie its so obvious. And most anime don't even have english dubs. I am not going to read subtitles just to understand a stupid autistic cartoon. You guys want to go to Japan because of sushi and anime. That's not all Japan offers you fucking retards! People who actually like that stuff have no lives and are virgins or extremely beta.

I've always had this fantasy of having Rem and Ram stacked ontop of each other..

Like Ram would be laying down, and Rem would be laying ontop of her.

That way their pussys are basically stacked together and you just stick your dick in between.
