Hi,

This is my first GIF signature, need your opinion.

EDIT:

Added 7 more frames and slowed every frame 0,2 seconds.

Looking good! It's clean, but the text is a little bit to fast. You should slow it down.

Thanks for your opinion, will change it.

Edit:

Better?

I agree with this, slow the text down and it'll make it 10x better, nice job man!

In this state in my opinion it hurts the eye because it looks laggy. The design is good, add more frames and make the transition be waay more smoother, and slower. It looks good as design though !

Yeah, more frames would make it better. Nice design though.

Good job on your first GIF, If you are interested in making more I would suggest using Adobe After Effects.

It may seem scary to get into at first but some basic YouTube tutorials can get you started and it will become

a lot easier to make gifs in after effects than Photoshop. If you do take my advice I suggest starting off on this video:

It hurts my eyes looking at it. It's a combination of the animation and the font.;

I like the font and the overall layout aesthetic but the transition effect is too choppy to look clean.

**toxicants** - April 11, 2017, 4:27 pm

I agree w/ the convo is irritating. Love Mr. Robot though! Sick gif.

This, it makes it less "laggy" and adds more of a "fade" to it.

can't say anything but I think something is missing, don't know what it is :(
