I got OBS and can use Twitch. I don't need to be invited to the group since you weren't interested in me being in it, but I can help. Let me know.

That's not a bad idea.

100% agree, also make sure the person have well pc specs to run stream on 60+ fps and without any lags or any disturbs.

Internet and pc specs will play the good stream role ;)

Thanks my man. Tempted to bump another person up to lead this with me. It gets annoying doing everything solo after so long lol.
