Thread: [whatsApp modified API |Instagram |snapchat Api |and 200+ programs|](#)

Glushko - April 7, 2017, 4:07 am

Greetings from pattrick , I am happy to provide this source and service to all of you. Here in this package I have modified the whats App APi and when u integrate your app or develop the same ,you will get these features

1. Get Notification when someone update profile feature.
2. Get notification when someone come online or goes offline (even u are blocked.)
NOTE- (for limited countries and depends on integrated app)
3. Can request last seen and profile picture of random user , Even they have set their profile as NoOne or for their contacts only..
4. you can also change tone of incoming message while chatting and can personalize.

Interested friends can Pm me or do add me on skype

[live:mythians.hf](#)

?

I am also giving two another APi of Instagram and snapchat ..
and excluding these social APp source.

I am giving 200 more APp source ...you can see another post i have already posted that.

so contact me if anyone needed those source.

welcome all once thanks for being a part of hf :) I am online now ,whoever need do contact me ..
:)
