Hi ?

I'm here to share my first tool: an IconChanger that can change .exe Icons easily and quickly ?

Here is a screenshot:

VirusTotal : 2/60 (I can assure you it's not a Malware <3)

Hmm this is not suspicious at all..... only that it was scanned 1 day and 8 hours ago and I scan it again....

Results went from 2 from last scan to 6 within 1 day.....?
