Make your own juice its incredibly easy and super cheap. I make it by the liter.

I tried this the pg/VG and nicotine was easy enough to get but I could not find flavorings. I'm not skilled with measurements. Also I'm afraid of getting the nicotine on my hands.

Wear gloves when measuring with nicotine, buy flavoring from Capella, Flavor West, TFA, there's tons of different options. Feel free to PM me for any further knowledge. I've been in the scene for about 4 years now and have delved into nearly every aspect of electronic cigarettes.

If you use vape, try some CBD inside of it. Way better than nicotine.
I always buy it myself from 1010CBD dot com

radicalxfrosty - April 30, 2017, 1:08 pm

Aliexpress has some really cheap ones.

I use to work for a vape company making the vape oil/juices but they offer a unique service that you pay a monthly fee of 20\$-45\$ and they mail you 3-6-11 bottles of vape oil a month, all dif flavors, always new flavors (We would make some really bomb ones too like key lime pie and strawberry milk and many more and you get your package monthly so you never have to go out and re-up on oil) They also sell vape boxes, vape pens, rebuild able atomizers, and mostly use Aspire for tanks which is a top quality of vape accessories. They also offer a 30 day free trail so check it out if ya want

Mountbakervapor

Vapewild

Vapecraft

Those are the three cheapest places to get juice that you will find online.

MtBaker and Vapewild have huge selections of flavors, and Vapecraft has 120ml bottles for only \$15.

www.efun.top, I have ordered multiple items more than once and can say they're definitely legitimate.

I won't be buying juice for the rest of this year since I won \$800 from a cloud comp lol
