Thread: [Invisible username](#)

iLogic™ - April 8, 2017, 11:49 am

Is it allowed to have an invisible username? I am talking about something like [this](#).

Thanks for answer! ?

Edit// Username seems to be invisible only on my side. Closing this thread.

Deany - April 8, 2017, 11:50 am

Huh? I see their current username it says Mikko

HighTier - April 8, 2017, 11:51 am

It is not invisible for me.

I can see his name just fine? I believe if the username doesn't break HF's layout and the text is readable english, it doesn't matter.

Your phone probably can't see special characters then
maybe that's the case

I can see it fine on a laptop though
