Thread: [NSA orangutan? \(from the NSA leak\)](#)

getoutnow - April 8, 2017, 1:34 pm

What exactly does this code do? it is documented on several chinese and iranian sites:

```
Code INTONATION__doors.co.kr__211.43.193.9__20020111-115417() {  
  ## ORANGUTAN Version:1.4 OS:sparc-sun-solaris2.7  
  export CONFIG_KEYS="886b051a 56725325 90fd347d"  
}
```

https://github.com/x0rz/EQGRP/blob/33810162273edda807363237ef7e7c5ece3e4100/Linux/bin/var/keys/intonation/ns.huawei.com.cn__202.96.135.140/jackladder

It's a cover up for what actually happened to Harambe. I know he's a gorilla, but they used the code word Orangutan instead, so it means nothing to a normal person reading it.

From my research i'm not sure how reliable it may be but there were hundreds of machines hacked that had that configuration.

That's mostly likely one of them oddly enough its a Korean system.

I'm not sure i've never seen something like that, maybe someone can share what they know?
