Thread: [shadow keylogger](#)

Gpizzle - March 5, 2009, 8:51 am

i came upon a really good keylogger its called shadow keylogger i didnt make it its meant for like local use no ftp setting that i know of place it on ur flash drive or the hdd of the victims computer
http://www.download.com/Shadow-Keylogger-Portable-/3000-2132_4-10832253.html

no its not FUD

has the usual things a keylogger would have
scan results

Gpizzle - March 5, 2009, 11:07 am

??? no body seems to care about keyloggers i guess Imfao kinda silent in here.....really quiet

thyzor - March 5, 2009, 11:08 am

nobody care about local ones :D

Gpizzle - March 5, 2009, 11:09 am

yeah true but hey it works lol

hacker12 - March 5, 2009, 11:43 am

ehh..only local, but good share

frozen - March 5, 2009, 6:15 pm

Nobody cares after you scan it at virustotal. Virustotal shares the info with all the other vendors. It will soon be detected by ALL of them.

Use <http://scanner.novirusthanks.com/> and tick Do Not Distribute under advanced options

pinkster - March 5, 2009, 6:17 pm

im still tryin to learn what keyloggin is all about but im still none the wiser cause i havent a clue about it so i cant comment sorry lol

macc9500 - March 8, 2009, 1:40 pm

testing right now

msg2short.

BlackStallion - March 8, 2009, 1:46 pm

Buy Mine this Tuesday - completely FUD.....

reason why i'm selling it is because of you Noob's uploading everything to Virus Total - I figure, if its something you invested in, you'll do everything u can to keep it undetected.

luxhacks09 - March 9, 2009, 7:46 pm

I am Gonna try this Keylogger

Thanx so much, one question, does it really work if I put it on a Flash Drive?

aswang - March 9, 2009, 7:52 pm

how can i bind the keylogger so i can send it to the target?
