Thread: [I have uploaded shell, but cant find it](#)

dark_angel1 - April 9, 2017, 5:08 am

I have uploaded shell on the server, But I cant find where is it because the site change its name and does not show me any link to get it and the folder path does not allow me to look into files

Mr. Robot - April 9, 2017, 5:10 am

What type of exploit was it?

dark_angel1 - April 9, 2017, 6:57 am

So the domain name / .com changed completely?
- Maybe they possibly found the shell? Hmmmmm...

for example
i upload this php file xxxx.php

it changed this file to number like this 762789767732892878.php

like
site.com/images/762789767732892878.php

but I can't find it correctlty

could you get it?

Null God - April 9, 2017, 7:54 am

Send me pm of the site, I will keep checking!
It is really file name 762789767732892878.php right ?

He said "a number like"...
I can take a look at it if you want, OP.

You can simply use tamper data to track where the file is sent.

dark_angel1 - April 10, 2017, 5:04 am

yes it looks like this number not that number

beladonis OK
