Thread: [PhantomLoad | LONGTIME FUD | ONLINE SOFTWARE | Good Features | Smart Storage](#)

MemoryLeak0 - April 11, 2017, 11:54 am

Busy with new projects... PhantomLoad is over.

ForceJew - April 11, 2017, 1:07 pm

Looks very cool GLWS.

Just one thing.

There is a bunch of spelling mistakes in the thread and u should check it out.

Seems HQ anyways.

MemoryLeak0 - April 11, 2017, 1:17 pm

Thank you. I am sorry for the mistakes.

ajbrose123 - April 11, 2017, 1:22 pm

I would like the vouch copy, if there is still any left. The website is really good made, awesome work!

MemoryLeak0 - April 11, 2017, 1:37 pm

(Apr 11, 2017 01:22 PM)ajbrose123 Wrote: [\[CITE\]](#) I would like the vouch copy, if there is still any left.

The website is really good made, awesome work!

Thank you for the praise!

Sorry we just offer vouch copies for members with a high reputation.

Washasat - April 11, 2017, 2:05 pm

well phantom thank you so much for helping me out ,thank you for being so kind and patient with me . you seem to be a very friendly person . good luck .

The paid version is working flawlessly , it is way much more better than the free version he offered lately . He had been in contact with me until i sat everything up correctly . go ahead and buy a subscription , you won't regret it .

EDIT : Latest scan results

<http://pscan.xyz/results.php?id=UrvQasWMonwMfDxD>

Thanks for these kind words. ?

? [\$(1000)\$] ? - April 11, 2017, 2:52 pm

PM sent. I would like a vouch copy. I will leave an honest review

react - April 11, 2017, 2:52 pm

Hey I'd be interested in a vouch copy to check it out, looks great so far. Will shoot you a PM too

MemoryLeak0 - April 11, 2017, 3:37 pm

You both will get one.

ForceJew - April 11, 2017, 3:54 pm

I would like to get a vouch copy to give my honest review.

TOM - April 11, 2017, 3:54 pm

Quote:3 Vouch copies left for HQ members.

IF you think I m a HQ member Please Let me know the procedure to get the vouch copy ?

Friedrich Nietzsche - April 11, 2017, 9:08 pm

> Next-gen storage

Could you elaborate about this?

> Strong encryption

Do you know that this does not matter at all?

> Certificate signer

You do know that certificates WILL get revoked if found to be abused right?

> Anonymity

You asks for an email address?

Curious about this.

MemoryLeak0 - April 11, 2017, 10:20 pm

You do know that certificates WILL get revoked if found to be abused right?

> Anonymity

You asks for an email address?

Curious about this.

1: We encrypt almost the whole stub so scantime detections are nearly not possible.

2: We use a 256 bit algo with a key and salt to encrypt/decrypt. It does not matter that much but it is not a bad feature.

3: We will sign stealer certificates. I am going to rename it later.

4: You heard from providers like protonmail or 10minute mails? A good account system is not possible without an email.

Friedrich Nietzsche - April 12, 2017, 12:34 am

3: We will sign stealer certificates. I am going to rename it later.

4: You heard from providers like protonmail or 10minute mails? A good account system is not possible without an email.

1: So basically put everything inside a DLL and make a loader which decrypts and load? That is not next-gen, you know? Many crypters are doing that already.

2: Doesn't make it a feature as it is irrelevant. Do you put "Use WriteProcessMemory" as a feature?

3: So you steal certificate and don't actually sign it? Does this mean you can't FUD your file properly and have to rely on fake certs to FUD it?

4: Sign up, login. Great system without email.

MemoryLeak0 - April 12, 2017, 7:50 am

4: Sign up, login. Great system without email.

1: Wrong.

2: Yes we use NtWriteProcessMemory.

3: It's optional. Nobody has to use it.

4: Otherwise you couldn't use the password reset, payment confirmation and you couldn't receive important mails? If someone is afraid to enter his right e-mail he can create a new one at protonmail.com for example.

Still FUD. Working on a new RunPE.

You caused very strange traffic. Thats why. Hope you can use the crypter now!

Flat Assembler - April 16, 2017, 7:31 am

Just what in the world is this

i.imgur.com/VEHmHrK.png Confuser's cflow

i.imgur.com/TnP71P8.png not even encrypted strings

i.imgur.com/4wlnHhd.png i.imgur.com/TqBlwhp.png startup slaughtered by 9/10 AVs

Il regret buying this to test

Raymond - April 17, 2017, 1:02 am

The second day already this error. Cryptor does not work. You awake days awake? Or correct the error

MemoryLeak0 - April 17, 2017, 6:46 am

skozyy - April 21, 2017, 11:19 am

It corrupts my file. after crypting my file never executes. please help

zomlom - April 22, 2017, 10:24 am

This crypter is by far the best I've ever seen, even If I only got into cryptography this week.

I encourage anyone looking for a clean, easy to use and advanced crypter to buy this one, phantom provides amazing support and the overall performance is amazing.

Just left this a kind regard to apologize for my mistake i made which lead to me getting permanently banned, I really had no idea I was fucking everything up.

Drummer - April 28, 2017, 12:01 am

Are distributing any trial copies at all?

skoizzy - April 28, 2017, 12:30 am

please i have tried all settings for a .net file but after crypting file it does not execute my file. Please help me on this. Thanks

Drummer - April 28, 2017, 2:31 pm

@skoizzy make sure your using the cryters settings and not your rats. If you have both your rats and cryter setting on then it can mess up the stub.

skoizzy - May 2, 2017, 9:49 pm

Yes am not using any settings from the rat. But it still wont execute after crypting.
