Thread: [Anyway to change the ISP name on SpeedTest.net? Any Ideas?](#)

**FakeHTML** - April 11, 2017, 11:55 am

Hey, HackForums most likely a stupid question, although when I go to SpeedTest.Net is there any way to change the ISP name?

I was thinking maybe changing it via a DNS? Although not to sure how DNS works and etc, could someone help me out?

Thanks ?

**Kayoz** - April 11, 2017, 12:07 pm

Don't know how except for if you use a VPN, but why would you want to do this?

Although if you use a VPN tho the VPN that's been set automatically has a preset ISP tho, so it wouldn't work.

I mean if you are wanting to take i picture iguess?

**KFC Watermelon** - April 11, 2017, 12:34 pm

It's not possible. Speedtest.net obtains your ISP through your IP Address. Changing DNS won't do anything.

**Grievous?????** - April 11, 2017, 12:38 pm

If you're just trying to change it for a screenshot, use inspect element.

**Mr. Robot** - April 11, 2017, 12:38 pm

You can spoof the results anywho.

**biodrone** - April 11, 2017, 2:52 pm

The ISP name is gained by checking the registries who owns the IP address you're connecting from. So the only way to actually change that would be to use an IP registered to another ISP.
