Thread: [File Upload Site](#)

NSA - April 11, 2017, 2:26 pm

I've setup a file upload site, unlimited storage..enjoy!

<https://multn.net/>

Virus scans, daily.

SSL Enabled.

Skidy - April 11, 2017, 2:41 pm

I like your virus scanner idea. May I ask how that actually works?

Check my upload site out too (its in my signature)

Thanks.

I use LMD (Linux Malware Detect).

<https://github.com/rfxn/linux-malware-detect>

I have it setup on a cronjob to run once daily, any detection are sent to quarantine nad cleaned/deleted.

It uses clamav scan signatures.

Did you make this site yourself? I have always wanted to do something like this but never got around to it.... have a pretty sweet domain to do it on.

Charger - April 11, 2017, 6:22 pm

I like the design.

I recommend removing the red I from the max upload size to keep with the theme.

Also, maybe consider making every L on the page red.

Not Your Average Orange - April 12, 2017, 2:10 pm

Pretty good site. I don't have any criticism but just so you know FAQ and ShareX Settings links are not working.

Edit: I like the source code illuminati, lol

That red letters are pretty annoying to me and serve no purpose of directing attention to them except upload button. Other than that, simple & clean - I like it.

I've removed the unappealing text formatting and coloring, more appealing now.
Thanks!

Thanks man. I'll get the 404'd pages fixed.

Alright, Yes. I agreed so I changed it up and it's more appealing to the eye now.
Thanks for your input.

Seen this yesterday, the red text made it very unappealing. I like it now.

Clean and simple. Good job.

Thank you, appreciate ya!

Moving to a better box, downtime for like 1 more hour.

Site is backup.

Had to move hosts because of a DDoS attack and now we are under Cloudflare, so we're good.

I said unlimited storage not unlimited upload.

Thanks

"The lips at the bottom make me not want to use the site" what I'm thinking

Why not? Doesn't affect the functionality

j10max - April 17, 2017, 2:42 pm

It doesn't, but it gives a weird feeling. I would give a bit of margin/padding on the bottom though, it's too close to the border of the page.

Alright, thanks for the feedback.
