I can get you inactive or active twitter usernames or whole accounts. But at this time only inactive username requests or accounts will be offering for a price. PM me only your handles with your price offering. Thanks

Hello I seen your post about getting inactive twitters I was wondering how much you charge not looking to pay anything crazy though thanks.

It depends on the username mate. But you can ask me for a price for a specific username then I'll answer it. Must be inactive as fuck so won't be an issue of restoration later on. I've hacked active ones but then the original owner restore it. So only inactive usernames will be considered.
