Thread: [Annoy all your neighbors.](#)

Mr. Robot - April 12, 2017, 10:50 am

Simple stuff.

SSIDS I used <https://pastebin.com/dl/0tzDmwEd>

Boot up the old Kali box, make sure you have a wireless adapter plugged in or you are live booting a laptop from USB.

Run the follow to put your wireless card in monitor mode.

Code `ifconfig wlan0 down`

`iwconfig wlan0 mode monitor`

`ifconfig wlan0 up`

Run this to make a spam list of networks - each network name needs to be put on a new line of the file.txt

Code `mdk3 wlan0 b -f file.txt`

I personally fill my file.txt with a list of the funniest wireless network names make your own list or grab some of the ones at the bottom in the pastebin

All your neighbors will see and hear are notifications of open networks around them which annoys the fuck outta people lol

2073436 - April 12, 2017, 10:52 am

Upload that txt file, Imma do this once I have some time but cba to write 100 sentences

Mr. Robot - April 12, 2017, 10:53 am

(Apr 12, 2017 10:52 AM)Skilo Wrote: [\[CITE\]](#) Upload that txt file, Imma do this once I have some time but cba to write 100 sentences

Just grab some from the pastebin, if you want it to use random characters just don't add the text file on the end or -f

It will make networks like

!@#%!^!@\$#!%\$@!

\$@!%!^!#^!%!

@\$!@%!^!#^!#^

Text file only needs one network name per line.

ZwntanosNekros - April 12, 2017, 10:56 am

I live at center of the town so i will have fun with lot of ppl..

Once again mr.robot nice tutorial.

Antonsen - April 12, 2017, 10:56 am

Is this also possible in university?

Mr. Robot - April 12, 2017, 11:13 am

(Apr 12, 2017 10:56 AM)Antonsen Wrote: [\[CITE\]](#) Is this also possible in university?
It works on any machine that can run mdk3 and put a wireless card into monitor mode.

gringo - April 12, 2017, 11:20 am

Nice I'm definitely going to do this when I'm in class, my professor regularly disconnects and reconnects from the wifi on the projector so this will be a good time haha.

Mr. Robot - April 12, 2017, 11:22 am

(Apr 12, 2017 11:20 AM)gringo Wrote: [\[CITE\]](#) Nice I'm definitely going to do this when I'm in class, my professor regularly disconnects and reconnects from the wifi on the projector so this will be a good time haha.

You could just make a list with his WiFi network ssid in the text file and spam it so he can't find which one is which.

If you have a nexus 5 or a device with nethunter you can use an OTG cable and a wireless USB dongle and run this attack from your phone lol

Noshy - April 12, 2017, 11:33 am

Posting to try this in future thx for tutorial

Zizlo - April 12, 2017, 12:31 pm

This will be fun!

Imma try this out soon

Pylon - April 12, 2017, 6:03 pm

This is going to be great!

Nice tutorial!

If you want to learn Python, Join Me! (#/96jKkqY)
How do you like my redneck signature?

:D??

eskimo1 - April 13, 2017, 5:47 am

Pretty sure this is illegal

Mr. Robot - April 13, 2017, 5:48 am

(Apr 13, 2017 05:47 AM)eskimo1 Wrote: [\[CITE\]](#) Pretty sure this is illegal
I'm sure in some places it is but hosting a single hotspot off a device isn't and if you had multiple devices there is no issue so making a tonne from one device? Who cares lul

Formal - April 13, 2017, 5:53 am

Is there a way to undo this? Just unplug the usb or would that mess something up?

Mr. Robot - April 13, 2017, 5:56 am

(Apr 13, 2017 05:53 AM)F?rmal Wrote: [\[CITE\]](#) Is there a way to undo this? Just unplug the usb or would that mess something up?
Just hit ctrl C and stop mdk3 or just unplug the network adapter. No big deal.

Formal - April 13, 2017, 6:03 am

(Apr 13, 2017 05:56 AM)Mr. Robot Wrote: [\[CITE\]](#) Just hit ctrl C and stop mdk3 or just unplug the network adapter. No big deal.
This is embarrassing because I'm confused how to do either of these lmao

Mr. Robot - April 13, 2017, 6:07 am

(Apr 13, 2017 06:03 AM)F?rmal Wrote: [\[CITE\]](#) This is embarrassing because I'm confused how to do either of these lmao
Press CTRL+C if you watch in the video to the end, you can see me stop it.

Formal - April 13, 2017, 6:09 am

(Apr 13, 2017 06:07 AM)Mr. Robot Wrote: [\[CITE\]](#) Press CTRL+C if you watch in the video to the end, you can see me stop it.
Didn't watch the video because I'm in class. I guess I should have waited to ask. Oh well, this is

interesting though I think I will give it a go after school.

?Døpe - April 13, 2017, 6:19 am

This is so simple and so awesome at the same time.
Thanks Mr. Robot as always. ?

Mr. Robot - April 13, 2017, 6:38 am

(Apr 13, 2017 06:19 AM)?Døpe Wrote: [\[CITE\]](#) This is so simple and so awesome at the same time.
Thanks Mr. Robot as always. ?
Hey man no problem, it's a good bit of fun.

Franklin Clinton - April 15, 2017, 5:01 am

Nice tutorial. Would this be possible to do on Nexus 5?

Mr. Robot - April 15, 2017, 5:28 am

(Apr 15, 2017 05:01 AM)XRipple Wrote: [\[CITE\]](#) Nice tutorial. Would this be possible to do on Nexus 5?
Sure is but you will need an OTG adapter.

Zach_Farlow - April 15, 2017, 7:11 am

just tried this and it only shows me a eth0 no wlan0

y.flicka - April 15, 2017, 7:16 am

This is such an simple but still so funny thing to do. I used to that all the time. I even heard my neighbours complain "who owns all these networks".

Franklin Clinton - April 15, 2017, 7:21 am

(Apr 15, 2017 07:11 AM)Zach_Farlow Wrote: [\[CITE\]](#) just tried this and it only shows me a eth0 no wlan0
Your wireless card isn't recognized as wlan0. Firstly you have to find out the name if your wireless card.

I did this by installing fluxion. It has an option on which wireless card to select, of course there's probably an easier way, but that's how I did it.

Sxyaf - April 15, 2017, 7:57 am

this is fancy.. have to give this a try

Spouse - April 15, 2017, 7:58 am

I don't get a notification sound when networks are open to me just saying haha so I don't see the potential in this but none the less its really cool and looks neat haha.

kpown - April 15, 2017, 8:00 am

Oh mr robot I just love your troll tutorials!

Gunna have to do this

Evil Corp - April 15, 2017, 9:55 am

does built in wifi adapters on laptop works?

Mr. Robot - April 15, 2017, 9:56 am

(Apr 15, 2017 09:55 AM)Evil Corp Wrote: [\[CITE\]](#) does built in wifi adapters on laptop works?

If it supports monitor mode.

Saber Tooth Ram Tiger - April 15, 2017, 12:03 pm

This seems like gold, can't wait to try in the dorms.

Mr. Robot - April 15, 2017, 7:36 pm

(Apr 15, 2017 12:03 PM)Saber Tooth Ram Tiger Wrote: [\[CITE\]](#) This seems like gold, can't wait to try in the dorms.

Do it dude and let us know the results.

zerocool - April 29, 2017, 12:02 pm

This is fun to do, but i was wondering how many networks you could created before it starts to cause an issue. ?

?

Rangers. - April 30, 2017, 1:57 pm

This crazy. Would like to try this soon.

Crillis - April 30, 2017, 8:49 pm

Interesting, I'll have to try this out! Nice tutorial.

Gigabear - April 30, 2017, 9:17 pm

Robot are you fucking john?

Mr. Robot - April 30, 2017, 10:39 pm

(Apr 30, 2017 09:17 PM)Gigabear Wrote: [\[CITE\]](#) Robot are you fucking john?

No, sorry I am not gay.

gitclone - May 1, 2017, 8:53 am

Golden mdk3. I remember creating tutorial regarding it omfor Royalty Pentesting section.

Well anyway great tutorial OP

nullassembly - May 27, 2017, 4:30 am

Interesting... I'll try this too!

Decim - May 28, 2017, 1:21 am

(Apr 15, 2017 07:21 AM)Franklin Clinton Wrote: [\[CITE\]](#) Your wireless card isn't recognized as wlan0. Firstly you have to find out the name if your wireless card.

I did this by installing fluxion. It has an option on which wireless card to select, of course there's probably an easier way, but that's how I did it.Ifconfig gives you the names of the interfaces.

(Apr 15, 2017 09:55 AM)Evil Corp Wrote: [\[CITE\]](#) does built in wifi adapters on laptop works?Most of them support it.

Good tutorial, would be more fun if the new APs have the same SSID as your neighbour.

331ab258 - June 1, 2017, 12:02 am

This is too funny! I'm going to do this later.

Obi-Wan - June 2, 2017, 9:40 am

Thank you for posting this tutorial!

However, I am receiving the error message "WARNING! Sending non-standard SSID > 32 bytes"
I am in monitor mode and followed your directions per your post as well as in the video. What do you think my issue is? Operator error? lol

Thanks in advance,
~ Obi-Wan

Mr. Robot - June 2, 2017, 9:42 am

(Jun 2, 2017 09:40 AM)Obi-Wan Wrote: [\[CITE\]](#) Thank you for posting this tutorial!

You are pure evil. I live in an apartment complex that consists of 6 buildings, and each building houses 12 apartments. All of which are in range.

Ian Pooley - June 12, 2018, 2:07 pm

Interesting to play with.

Originally I found this on the SecurityTube site. Good ol' BackTrack times.

All the AP's around could be deauthed in the neighbourhood and back then, I could manage to show only your own soft AP (e.g God). ?

Thank you for the tutorial. I'll be checking this out on NetHunter as well for my 2nd Android, in the subway ?

Eternal. - June 14, 2018, 7:26 pm

This is fucking hilarious, will bookmark this for when I get bored as fuck. I already have 4 Wifi networks with weird ass name to troll the neighbours a little but this is next level lol.

Berd0 - June 15, 2018, 11:57 am

Niqua just buy a 1000w subwoofer that should do the trick too
xDDD

I personally fill my file.txt with a list of the funniest wireless network names make your own list or grab some of the ones at the bottom in the pastebin

All your neighbors will see and hear are notifications of open networks around them which annoys the fuck outta people lol

I personally love doing this. My neighbors party non-stop and keep me up. So a simple script and the broadcast domain of their AP is flooded with DEAUTH packets. They go to look and see why they can't connect to find 30+ SSIDs named things like "STFU, GO THE FUCK TO SLEEP, You just bought me bitcoin," etc. Then there's the always fun "SURVEILANCE VAN" SSID name. But going about broadcasting an SSID this way you can have literally unlimited names showing. Also I edit country codes and set the Tx Power higher than allowed so ensure they see it

System52 - June 25, 2018, 7:08 pm

that looks fun i will try that soon

Black Hat - June 25, 2018, 8:47 pm

(Jun 8, 2018 05:26 AM)Mr. Robot Wrote: [\[CITE\]](#) Did you come back in the future?

Do you know any decent network adapters that can amplify 2.4 ghz past the usual range? My whole estate pisses me off and I want them to feel my wrath.

tereseK - June 29, 2018, 6:27 pm

i tried it yesterday, it works!

Funny as hell!

TheForsaken - February 16, 2020, 4:31 pm

Nice work! This would be fun to do in a crowded city

device - February 18, 2020, 8:30 am

I have to admit this is kinda funny.

Big Chungus - February 20, 2020, 7:11 pm

Perfect for that one annoying neighbor that blasts music at 1 am

Stanley - June 23, 2021, 9:29 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Hahaha Let me see what's up with this

meowlord029 - July 7, 2021, 12:18 pm

doing this to my university

iB707i - July 7, 2021, 1:00 pm

fantastic I'll be trying this tonight lmao
