Thread: [Clear IP , Smtip , Inbox smtp ??](#)

Unicorn-Pussy - April 13, 2017, 2:41 am

First post

Hello everyone, I am new to mass mailing and have a couple of questions. I will send out daily mails to about 3-4k fresh emails . I bought a software from here and I can spoof my email, everything is ready only thing is when I use a companies email it goes to spam how can i prevent that ? Mail is spoofed. I heard of clear IP , smtp servers etc...

Thanks in advance.

contact me for good smtp and cpanel, good cpanel \$5 domain smtp unlimited \$15 am on kindandtrust@gmail.com

Charger - April 22, 2017, 1:48 pm

You can't spoof the header and expect it to not go to spam.

The domain needs an SPF record that contains the IP you are sending from.

Google it.

davidjames365... if you have smtp why not create a market thread for it...cause I need one

limitlessatt - May 14, 2017, 5:48 am

i need smtp badly please I need supply of smtp

Friendz - August 14, 2018, 10:43 am

Good day,

hoping you got a good result from this thread,

PM you
