(3/3 Bots Left)

Hello Fellow HypeBeasts,

Today I took an L on the Box Logo drop. I was on a phone, hopeless, with no bot. I even had autofill! So today I present you a cheap custom coding service.

I will code you a personal Supreme bot (other websites available) that will cop anything you want. This bot is not meant for reselling as it will be coded for you.

Overview:

You select early links/keywords and the bot add them to the cart and then opens the checkout page with all your info and auto checks out/lets you manually check out. You can manually enable checkout if one of your items seems so be out of stock (probably not) and the bot will refresh and keep trying again until it adds it to the cart. You will be able to add unlimited tasks & proxies.

Pricing:

Package 1 - \$50 BTC & PP

No bullshit, no 56549876 different packages.

Features

- Everything Listed:
- Auto Checkout/Manual Checkout
- Captcha Box/Bypass with 2captcha api
- Fast coding
- PM/Add me on skype to buy.

Vouches

You will be able to add unlimited tasks

This bot is not meant for mass operations/reselling as it will only have one checkout screen enabled by you.

What?

Isnt that the opposite of each other

Do you also design the gui, can you make it into a mass type thing.

If so add my skype : mrmark012345 , I can pay extra lets talk.
