UI design :

9/10 The crypter is very simple to use, clear and almost perfect in my opinion.

Support :

10/10 HORUS answered my questions very quickly, he's patient and very effective, you cannot expect of better

Encryption Result :

10/10 Not much to say, it was FUD all during the time i've used it. I had the opportunity to test the runtime result with Avira and Avast, and they wasn't detect it.

Well guys, it was my honest review on it, I wasn't influenced to write it, if you hesitate to buy it stop waiting and do it ;)

(Apr 27, 2017 07:34 AM)kessix2 Wrote: [\[CITE\]](#) Wow. Great product!

- Avira no problem
- Avast no Problem
- Kaspersky Inet. Security no problem / Kaspersky Totoal Security no problem
- Eset not problem
- AVG Antivirus no problem
- Avast no problem
- 360 Antivirus no problem

That was my test, all FUD. The others AVP I did not test it. (Apr 15, 2017 12:49 AM)UKninja Wrote: [\[CITE\]](#) Awesome mate, great to see you release this finally. The path you are copying the file to is not private. Even if it is, that doesn't make it a private installation.

No because the kid is too retarded to change the createprocess call in his pasted runpe to @AutoltExe instead of regasm

[Video: <https://youtu.be/MrzwnK5QOqA>]

NIXY - April 23, 2017, 10:30 am
After one week using this crypter I finally post my review.

UI design :

9/10 The crypter is very simple to use, clear and almost perfect in my opinion.

Support :

10/10 HORUS answered my questions very quickly, he's patient and very effective, you cannot expect of better

Encryption Result :

10/10 Not much to say, it was FUD all during the time i've used it. I had the opportunity to test the runtime result with Avira and Avast, and they wasn't detect it.

Well guys, it was my honest review on it, I wasn't influenced to write it, if you hesitate to buy it stop waiting and do it ;)

Awesome! Cant wait to test it due to a lot of good feedback. I purchase this in few hours and leave a detailed feedback soon. I will give feedback regarding

- encryption quality
 - RT/ST tests with different settings
 - RT/ST tests with increased sensitivity/efficacy in AntiVirus solutions
 - FUD duration for a single binary also runtime
- software quality
 - GUI quality
 - response
 - crashes & errors
- features
 - functionality
 - well implemented or not
 - real as advertised ?

Please give me some time so i can elaborate something nice

991z3r0 - May 3, 2017, 3:10 pm

Again gotta vouch for this guy and the great cryptor. Was detected for a few days if that now it's completely FUD with even more options then the original. Binder works awesome now as well, fast crypting and the file sizes aren't to shabby either.

Can vouch again for this protector. The seller doesnt lie and the product provides quality as advertised. ?

Is the private stub 100% unique from the public one or only 90% oder less ? Need 100% unique and strong coded one. And i mean 100% unique code. Please dont say it is unique if u there is 10% similarity of the stub. I had contact with some sellers and they provided me 3 private stubs and i only used 1 for weeks the others were in password and filename protected rar archive. When the first one got detections all others had the same detections. Very bad. Scammed! Looking forward.. invest some time and work on it.. it is worth. :)

I just paid for 3 months, 90 days, awaiting the confirmations. I have high expectations from this crypter, based on what feedback people are giving. OP, this better bypass AV's. My main concern is, will it bypass AV's. I do not care about anything else. I do not need UAC bypass or anything, just runtime AV bypass. Awaiting the confirmations so I can get my hands on this. In need of a fud crypter badly.

Review!

Looks: 8/10 | Very simple design.

Stability: 10/10 | Very stable, Have ran into some issues with native files but was resolved in the end.

Features: 8/10 | Not many features compared to other crypters/protectors but the features work so that's a + for me.

Support: 10/10 | Horus is a nice guy and goes out of his way to make sure you are getting what you paid for.

Overall: 9/10 | Great crypter for FUD times and Stability, Could do with some more features but other then that great program!.

I also Vouch for this software as the support is amazing and the program is great.

(Jun 1, 2017 02:38 AM)hurac3n Wrote: [\[CITE\]](#) Don't want to sale trash, but I think I need to speak out.

I was provided by Horus with the link to the corrupted file, after I purchased his crypter via selly.

I bought this crypter and it ain't even working, as he doesn't give a damn about it, I mean I did purchase it via selly and Horus provided me with faulty file.

Tried to contact him and reported issue asap, as he promised me to provide me with working file within an hour - as you probably figured it out by your own, he didn't send me anything.

He didn't even bother to respond to my latest messages.

As he stated in sales' page - all transctions are final, no refunds, unless they fix errors within 24hours after purchase.

Well this is a cheeky way to rip other people off, I reported an issue within 2-3 hours time and it

hasn't been solved in 24hours, got no answer to my request whatsoever.

Probably lost my money as Horus will state that the 24hours time has past.

Just beware of this seller, time and again we'll encounter some cheeky people on hf, who won't give a shit about your problems as long as you've paid them, as soon as transaction is over you can kiss their ass.

Oh yeah, one last thing.

If you are going to sell something that isn't even working, STOP WAISTING OTHER PEOPLE'S TIME AND COMPLAINING ABOUT THEIR BEHAVIOUR.

They are entitled to be pissed of due to your incompetence. Yea horus dont sleep eat and or have a personal life?

Please wait as HORUS does need to sleep eat and hell have a fucking gf to take care off

(Jun 1, 2017 03:18 AM)hurac3n Wrote: [\[CITE\]](#) Here's the lesson to be learned for seller on hf:

If you're going to sell something that ain't working, just don't do it - simple as that.

I paid for something that is faulty, give me money back & stop waisting my time. Stop fuking around and making ridiculous excuses - you can have your private live, but I don't care, as I've paid for something that doesn't work.

It's typical on hf that people who complain rightfully will be attacked viciously by dear dear friends of OP, but that doesn't necessarily mean you're right, cause you ain't.

Fud results are really very good with horus,and also not to forget the runtime,which bypasses most of the avs easily.

And yes its fud time totally depends on how u use the crypt.

Normally the fud time can be from days to week.

His license should be ban immediately and no refund obviously for trashing sales.

Poor guy dont know how to use cryptor and crying.

If you cant use this cryptor,you cant use any.you will always be crying.

Admin pls ban his license.

"Poor guy dont know how to use cryptor and crying."

Where did you get this statement from? Did you read the chatlog? It's about a refund, not about some settings or anything else. Re-read the chatlog.

I am not sales trashing because that would delay my own BTC refund isn't it? Do you think I am that stupid?

Edit: If you wanna keep going on with my issue on this thread go ahead, not my problem. I am willing to show earlier chatlogs as well which reveal much more than your statement against me. I will delete THIS post once I see my refund coming.

didn't you read TOS?

refund? only within 24hrs if u have problem with the files supported by cryptor and its not working.

you are not born on mars, i am using this cryptor with im5,nano,luminosity,quasar all are fine and runtime is great.

every cryptor has a downtime and owner takes sometime to refud.

you should be aware of it.

asking for refund simply means u have change ur plan on crypting.
and there should be no refund for it..?

I can vouch for HORUS™ all files have a very good result (FUD). Don't hesitate to deal with him! ?

PerfectStorm - June 30, 2017, 6:26 pm

Don't listen to any complaining sales trashers, this crypter works fantastic and I have always had great support when I ran into any errors (which turns out they were on my end anyway) If the proofs came falling out, I think any legitimate customer would support Horus Protector.

HONEST REVIEW ABOUT THE PRODUCT:

How many times used: Over 15 times

When bought: 3 weeks ago

FUD: You get MAX 3/40 detections and MIN 2/40 detection.

The detections are from Jiangsu, another unknown AV for me and rarely NOD32

Support: 9,5/10

This guy is fcking supportive and always patient! He has spent lots of time with me, showing how to solve issues I had.He really is awesome when it comes to support

Price: Affordable and currently, the best price/quality on the market

Design: 8/10

The tool is really nice and cool.Never ever has it crashed.

Quality: 7/10

Cons:

Stub size (over 1,5Mb)

Process name on Task Manager shouldn't show (it shows as MS--5 which is very suspicious)

Stub gets stored in Appdata and not hidden (at least to me, maybe I'm doing something wrong)

I hope he will solve at least the last 2 on the list in a future update! I would really appreciate that!

Overall: Support this guy and his product! I will buy the 3month package just so that I can see more coming from him!

I think with a select userbase and slightly higher cost you can become more selective and have less misuse of the product. All users will be happy. Maybe selling private stubs is also a good option for users.

Good luck with the developments mate. I know you are always working hard to improve your product.

Welcome my friend U.K. Ninja appreciates your reply. Users already can choose process name and supporting native files also we maked a lot of developments but plan to do more

Worst crypter i've ever used. Stay away.

Crypting barely works. I managed to get it to crypt like 3 times after 20 tries.

This pops up when you crypt a stub:

<https://i.imgur.com/6qBLcDS.png>

Somehow it is 'crypted' succesfully after that message, then it pops up this:

<https://i.imgur.com/cCfr8X7.png>

Stub file: <https://nosharescanner.com/scanResults/olsyvz00527495>

2-3 detections is okay! 9 is too much.

Also the version check:

<https://i.imgur.com/VGU6Npa.png>

Very, very poorly done.

Overall Rating:

3 / 10

is this how you should handle customers ?

if U are costumer so you should respect TOS , also when you have any problem you asks for help first because you may be make something wrong ?

he said what was wrong and what not.

This just tells me once again to not read the vouches below any product.

90% are just stupid lies.

If you would support the product and believe in it, you would simply have helped him and not put a wall between you and him.

He offered to change his review once you fixed the problems.

but you simply don't give a fuck about that and just tell him that he broke the TOS.

i bet you reported his post already for "Flaming"

any user face issue i helped him and helping as you see from other users wrote in the thread , and for issues who users faced we created support thread so no reason to write shit without having support and then he write his review as he like

may be this issues not belongs to the crypter as many issues happened because user's ISP blocked the connection or wrong settings

Also he PMed and added him to skype then didn't hear from him

Crypting barely works. I managed to get it to crypt like 3 times after 20 tries.

This pops up when you crypt a stub:

Somehow it is 'crypted' succesfully after that message, then it pops up this:

Stub file: <https://nosharescanner.com/scanResults/olsyvz00527495>

2-3 detections is okay! 9 is too much.

Also the version check:

Very, very poorly done.

Overall Rating:

Hahaha you fail big time at using this crypter properly. You should remove that post just out of embarresment, if you want support now you can find it back the way you came. From me anyhow.

Very, very poorly done. You cant even spell honest I see by the way.

I know you feel like hes the one being rude, but you should not have posted negative stuff in his sales thread unless it has been a min of 24 hours without getting it resolved. And why are you talking for "him"? why doesn't this wonder person come here and complain himself.

"I bet you reported his post for flaming" Well that just shows how immature you're, Id exempt you just for your age alone.
