(May 20, 2017 09:58 AM)police112 Wrote: [\[CITE\]](#) Bought a botnet setup from this guy and he did it all very quick and easy - I am really an old account guy since 08 so I know my stuff around HF and been here for a long time this is just a secondary account because my other one was inactive for x time and got closed and Omni refused to reopen it for me

Anyways this guy offers a wide range of setups for a good price and will include a shared offshore hosting with it if you want for a good price he also handles all the setup for the HTTP side so you really never have to lift a finger except to pay and he is lightning fast as well he got mine up in around 5 minutes after payment was confirmed I am not in any way linked to the seller or have any ties with him whatsoever, he gave me the server file after he finished it and that was about it, he is quick to answer questions also and promised that his service was 100% legit and assured me that the server file was not bound or anything since i asked him lol, so overall

Choices: 4/5 here you have a lot of variety to choose from he has many types of botnets / rats
Features: 4/5 Many of the botnets have nice features and he will help you determine what botnet features is the best for you
Price: 3.5/5 The price is reasonably good although not cheap cheap it's pretty cheap and not above the average price
Speed: 5/5 Super fast, the guy added me after a few chats and he answered all my questions super fast and after getting payment it took him like 4 minutes to set it up fully
Customer service: 4/5 Really good customer service answers all your questions that he has answers to
Overall service: 4/5 Overall good service that is not too pricey and has good variety depending on what you plan to do

Nenny - May 12, 2017, 2:59 am

Althought very helpful, and somewhat friendly, the services that he are offering are not worth the money he is asking. The spreading method he gives is something that is easy and anyone would think of, not really gamechanging if you ask me. The hosting is decent, but you will not get access to Cpanel or anything to monitor your databases and what not. If you need to change a value in a table of your DB you have to message him and it takes a lot of time before he will reply and change the values. It is normal noone can be online 24/7, but if you could modify this your self you would have it done faster and with no risk of misunderstanding. The services he offers are not remotely close to the price he is asking, and even tho it seems like he knows what he is doing he still has a few things to learn. The botnet itself is setup correctly but safety precautions seem to lack(making the indexes private instead of public is a step that i would make but he does not do so in his setups). Miss spelled my name during the setup and it took a while to get fixed(still not fixed after 12+ hours). The price on the forum is in \$ he asks for € instead, wich for me should have been the first step of showing little professionalism and the packages listed on the forums are neither the same ones he is offering nor they have the same prices as the ones he wrote on his post. I asked if it was possible to change to a different panel later on as I still did not have access to the one i was planing to run. He asked for a supplement of initially 25\$ for the setup of the new panel, then he offered to do it for 15\$ as i pointed out that i already paid for the setup and that should include setting up Cron jobs as that is a part of the setup. The tos do not say anything about a "no refund" policy(tho he sais he can change it any time) but ask for one and you will be insulted and called a skid, overall for me this was a terrible experience and would not reccomend anyone to buy. I found this to be a waste of my money. There are many different, cheaper and better options on the forums if you need a setup. this felt more like a 'number 2' setup then the number 1 advertised.

Bought lifetime support from him, paid we made our deal. We had a few issues and i left a negative comment, he told me to replace it to get support, i did and he left me negative review for no apperent reason and now that i was looking for support can't seem to get in contact with him. I honest to god have no idea why he gave negative Rep cause i left an honest review. That is just wrong in my opinion. Just letting anyone know that if you leave a negative (yet honest) review on here you will get negative rep and he will blame you for 'flaming'. If anyone wants more information i will post it with no hesitation :)

I ordered from Theo 5 days ago. In the end when I received my product I was happy with what I had purchased. The service is bit iffy though. PMing him was tough which is why it took so long, Pm's could take more than 24 hours to have a response. Besides that there was some issues with my bot net that I had, this happened twice and combined with the late replies delayed the finished product.

The product is good, theo is the only one I could find with a working plasma builder. Please make sure to read and reply to users pms faster though.

?onderland - September 27, 2017, 9:16 am

(Sep 27, 2017 09:02 AM)Jacob Wrote: [\[CITE\]](#) Op has been setting up my botnet for a five days now, I have not been able to test out the product yet, however this is my current review based on the customer service I have received. This post is not meant to trash OPs sales. I dont know where others have been saying the reply speed is good because its not, I wait over 24 hours for a response. I understand I may be in a different time zone as Theo but I have seen him online while my messages are unread. My other critique is that my botnet has been setup twice now, both times it has not worked. So far I am not very happy with this service, I am loosing money on other products I purchased and cannot use because my botnet has not been setup. I will edit the review when I can test the entire product.

I would have to agree, I bought a setup a bit ago and it never worked and he never replied to my skype message.

Constantine_XII - September 27, 2017, 5:56 pm

Top quality service.

Lad sells bullet proof botnets, and a good list of nets to offer.

Got my shit done in very short time. Only a few mins and he had me set up with the Plasma HTTP bot I asked for.

Thanks to Theo's botnet set up I now mine about \$40 worth of zCash a day and soon ill be upping my bot number and ill quit my job.

Top quality lad right here. Don't hesitate to do business. Never have any problems with my net or this guy.

tesla-hobbit - September 28, 2017, 8:33 am

Dear newbie botnet users, when you deal with this seller, be aware of:

1. Zyklon botnet which he can sell to you isn't working(I can give full access to the panel he configured and show. Preferebly to Uber members to give a negative vouch). The bot is connected, but other is not worked at all !
2. If he giving you a server it won't be the private server, it's rather hosting(a spot on server) which could be accessed with server owner and your botnet could be easily stolen with this owner !!!
3. He loves your money and won't return them to you even if something is not working.
4. Wish him to bump up the professional skills, since advanced users won't be comfortable to deal with him.

Don't let you get scammed, read his neutral feedbacks, since he probably avoids technically advanced Uber users which can give him the negative reputation

GLWS OP.

P.S. I caughted on his slick marketing, but he sold me the free shit from the internet, some of which not worked as intended. Please look for the disputes created on him on the Marketplace.

How is he selling you a setup with Zyklon if the coder is away? Does he advertise it as the cracked public version?

J?cob - September 28, 2017, 11:16 am

Purchased plasmahttp botnet, Bots can load in but instantly get dropped. Pretty disappointing really, You should know how to set up a botnet before you start selling it to users, hes had to setup the botnet 3 times now, this will be the 4th

tesla-hobbit - September 28, 2017, 2:59 pm

He told that it is cracked by him. Prove(at the end of screenshot):

<http://prntscr.com/gqy9bo>

P.S. That's partially my fault, since I know that most cracked zyklon copies are shitty. Though I paid to Zyklon for a one bin copy and he just disappeared in a while, and I didn't receive product(because his auto buy site experienced glitches). So I upset and started to look for a worked cracked version.

I can extremely vouch for this guy, he is "the guy".

He helped me with my botnet in many ways, he knows a lot of things.

If you need someone that can make your effective botnet, well... contact him.

Bariscoskun34 - October 28, 2018, 10:16 am

I am test Prof botnet services test please ?

Osiris094 - October 29, 2018, 1:20 am

Purchased Silver package, just waiting for him to come back online and do it as he went offline on me.

Stanley - May 9, 2020, 1:56 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

OP is doing a wonderful job with aiding me in picking out health alternatives to high fructose corn syrup containing products. We have been shopping for around 2 hours total, talking back and fourth, and he really makes sure I understand the nutritional benefits of his service.
