Thread: [STEAMWORKS DEVELOPER BADGE! \[LIMITED OFFER\] --- VERY FAST --- SECURE/SAFE --](#)

ThatOneDeveloper - April 15, 2017, 1:53 pm

I'm selling Steamworks Developer Badges for \$50 a piece, if you're interested feel free to leave an offer below.

What is a Steamworks Developer Badge?

- A Steamworks developer badge is a badge you get when you become a developer such as advertising, graphic designer, or all in general anything for working on top of a game. However, you can get some if you publish other people's games or been on steam since the very beginning with no vac bans and for being a community moderator which is what i am. I can publish anyones game + get them a steamworks badge.

How can I trust you?

- I'm a brand new account and i dont have any reputation.. so not really?

Well i really want to make some money doing this as i'm in debt with my house right now and i'm not going to be doing more than 10 badges so i'll be doing for my first few going first, i'll give the user their badge completely first.

How many can you give?

-Well there is no limit but once you past 10 it becomes in valves moderation pass through meaning one the steamworks dev panel it will notify the admin/developer that theres been more than 10 developers added to the panel and must be put into review. So i'd only be doing 10.

How much will it cost?

-Make an offer, first few can be cheap (cheap being around \$50) and would have the price going up the more it sales.

How will the transaction go?

- As i said before as i'm very new and would expect to be untrusted i will be going first and will expect to recieve the payment after.

Can't you remove the badge?

- Yes & No, what do i mean? well i can remove the badge but it has to be put through another pass through meaning has to have a valid reason... but wait i thought you could remove it instantly? i heard it from thi... No i'm not a greenlight developer so it doesn't work the same way so if i remove your badge it will go through moderation and they send you an email saying your status has been revoked from the steamworks developer including your badge, it will allow you to respond to it stating what happened, you can easily tell them you bought one from me and get me removed so yes i'm risking my reputation on steamworks for this, and if you ask why... well i need the money in all honesty regardless of what you think.

Please note if you do get one from me, i'd appreciate a vouch or some people saying it was trust worthy and it went through smoothly.

Thanks again for this opportunity, if you have any questions of the legitimacy or in general feel free to ask. ?
