Thread: [What class/subject do/did you struggle with and which did you breeze through?](#)

ZuGgY - April 16, 2017, 1:13 pm

I remember I struggled with Organic Chemistry, but breezed through subjects like basic chem and biology classes.

Gligar - April 16, 2017, 1:18 pm

Smashed French at GCSE with a solid E.

Ergonio - April 17, 2017, 5:00 am

Struggle : French

Breeze through : Maths

Summit1g - April 17, 2017, 1:36 pm

Struggle: Computer Science & Math

Breeze: Everything else

Classic™ - April 17, 2017, 1:37 pm

Struggle : History / Law & Government

Breeze : Math / Chem or Science

Undefined - April 17, 2017, 1:38 pm

Organic Chemistry just like you and History. Hated those. Breezed through Physics and Biology though. Math too.

RMSacrifice - April 17, 2017, 4:03 pm

Breeze: Math, Physics, Chemistry.

Struggle: Literature, German.

aimware - April 17, 2017, 5:06 pm

Shredded languages, they just come easy to me.

Math is always a pain in the ass, but chemistry is easy.

Patches - April 17, 2017, 6:32 pm

Struggle: History

I didn't have a problem with really anything else. History was just a combination of bad teachers and it bored me quite a bit

let it rain - April 18, 2017, 2:53 am

struggle: English (even tho i am half irish and english.) & chemisty

Breezed: Maths, Business and computer science.

VmX5 - April 18, 2017, 3:28 am

I breeze through Computer Engineering, Science, and English

I struggle in Math which is weird...

belboys1 - April 19, 2017, 3:29 pm

struggle: English (I am English myself) & German

Breezed: History & Maths

Underworldproblem - April 19, 2017, 3:35 pm

Struggle: English - I had horrible teachers in high school who were uninteresting, they had no clue how to make Shakespeare entertaining, and their essays were not creative at all. It was until Grade 12 where I had this amazing English teacher that made me absolutely love Shakespeare and the rest of the course material.

In post-secondary, I struggle everywhere :(

Breezed: Mathematics (Algebra and Calculus) and Science (Physics and Chemistry)

lanterz - April 19, 2017, 5:56 pm

Idk why but I always struggled with math and programming but the rest is easy.

kilograms - April 20, 2017, 7:02 pm

i struggle so hard with math, but everything else i thrive in. except music class. fuck that.

Triops - April 20, 2017, 7:03 pm

I always struggled through math but seemed to breeze through any science/language course I took.

lust - April 20, 2017, 7:16 pm

I managed to breeze through French, Science, and even English courses. Hardest class I've encountered so far was AP World History and a bit of a slow start in Algebra but once I understood the fundamentals the class was pretty easy.

8UrD3n - April 21, 2017, 1:42 am

Hs as a unit was a struggle for me. Classes interrupted social time. Lol. But when i got serious I learned that English and other languages were easy to grasp and fun. Math has been my nemesis and was until I entered college

Yell - April 22, 2017, 10:01 pm

Breezed through all high school math, struggling with general chem (college) its rough..

.HackII - April 23, 2017, 2:19 am

I breezed through every class aside from Algebra 1 and 2, still on 2 as of now and you guys are gonna see a LOT of help request posts. It's just a concept I don't grasp.

Meskaliin - April 23, 2017, 2:23 am

Well i breezed through math, struggled with chemistry and physics

Elitas - April 23, 2017, 2:38 am

Biology annoyed me, and it still does.

kalachov - April 23, 2017, 2:55 am

Math was practically the hardest topic

Jaxo - April 23, 2017, 1:26 pm

I always struggled with Maths, really bored me so never paid attention which made me suffer in the long term. Starting to pick it up now that I am using it for work.

Latins - April 25, 2017, 2:13 am

Biology for me only because my highschool teacher taught it like a professor.

Batz - April 26, 2017, 7:31 am

Chemistry was difficult for me until I realized all I ended to do was study

g?th - April 27, 2017, 6:39 pm

IB Chemistry is very difficult for me. I also do not enjoy the volume of work we receive in English HN, and the scrutiny she uses in her grading process. Overall a very unintelligent teacher and redundant subject. Math and other courses are pretty easy for me to understand.
