Programming, Optimization, and reFUD Service

Industrial Style Code - Enterprise Ready

Programming ServiceAssemblyC C# C++ Go VB.net Java Python Html Css Php Javascript jQuery aJax Angular React and more.Contact us for your programming needs, raw assembly, inline assembly, c/++, and php backend development. All PHP code will object oriented and abide by PSR standards set by php-fig. <http://www.php-fig.org>.

Stub reFUD Make your crypter fully undetectable!Running a native crypter but having trouble removing detections? Having false positives or your malware is detected? We provide reFUDs for C and C++ executables. The source code IS needed, and the time it takes to create a FUD output varies depending on your detection rate. Achieved via changing instructions, code flow and many other techniques, your file will no longer be detected scantime by antivirus solutions when we are done.

OptimisationIncrease EfficiencyEfforts will be made to increase the productivity of your program, this requires the source code of your software. Your software source must be in C/++ this is not optional. I will run speed-tests using multiple algorithms in key parts in your code.

Decrease FilesizeSource of your code is not required but recommended, following the assembly is much easier with the source which aids in optimization and decreases the time required for service completion. This is not any sort of encryption, I am minimizing the amount of instructions your code uses, your code will not break or have any sort of additional requirements to run. Filesize difference is minimal! This is for people who need every byte gone they can get.

Contact Information

Myself and Friedrich are co-founding this operation, PM either of us:

TOS:

- Refunds will only be issued if unsuccessful.
- Only Bitcoin and Monero (XMR) are accepted.
- I withhold the right to refuse anyone for any reason.
- After the service is completed your code will be deleted.
- I will not be inspired by your venture, don't offer a % of your potential profit as payment.
- No back-ups are made therefor I cannot provide you with one if you lose your optimized program.
- I can attempt non c++ created programs with x86/x64 output however make no assurances.

Like the thread design? As do I! Created with <https://xadamxk.github.io/ThreadDesignGenerator/> courtesy of xadamxk.

Updated OP accordingly, take a look at the thread update to see our reFUD service.

Friedrich Nietzsche - April 21, 2017, 9:27 pm

Still offering this service, get your work done by professionals now!

Uefi - April 23, 2017, 8:07 am

We now offer PHP services, have a backend made or your current one redone up to enterprise standards.

ForceJew - April 24, 2017, 10:21 am

This is very HQ.

We appreciate your kind words, thank you for endorsing the service!

Friedrich Nietzsche - April 25, 2017, 10:10 am

Still developing quality software using C and C++. Contact me if you have any questions.

Uefi - April 28, 2017, 9:58 am

We are accepting crypter projects, get a custom native crypter/builder made with a personalised CLI/GUI, full FUD, optional private runPE. Full rights.

Friedrich Nietzsche - May 1, 2017, 2:02 am

Just finished another project. Contact us now, we have project slots available.

Uefi - May 1, 2017, 6:14 pm

(May 1, 2017 02:02 AM)Friedrich Nietzsche Wrote: [\[CITE\]](#) Just finished another project. Contact us now, we have project slots available.

PM Nietzsche with further requests, I'm working on a rather large project and do not wish to slow down production.

Uefi - May 3, 2017, 2:58 pm

(May 1, 2017 06:14 PM)Uefi Wrote: [\[CITE\]](#) PM Nietzsche with further requests, I'm working on a rather large project and do not wish to slow down production.

Taking orders again as of now, making my morning coffee then sifting through PMs.

Friedrich Nietzsche - May 4, 2017, 12:10 am

Still developing quality software for all. Don't hesitate contacting us.

Uefi - May 9, 2017, 2:33 am

Thread deisgn coming soon further delineating and offering a larger variety of languages, another team is being assembled, if you have any questions regarding the new languages supported, private message either Friedrich or myself.

SIM-2762393 - May 10, 2017, 6:41 pm

Vouch for this service! He knows what is he doing, and he's a professional coder. Don't hesitate to use this service!

Thank you for your vouch, appreciate it.

Uefi - May 11, 2017, 10:08 am

We are working on another project and have decided to temporarily no longer accept reFUD requests.

Olatunji09 - May 15, 2017, 7:41 am

do you create private stubs , can you pm me your skype ? also do you create/clean shellcodes and process hollows ?

Friedrich Nietzsche - May 15, 2017, 7:54 am

(May 15, 2017 07:41 AM)Olatunji09 Wrote: [\[CITE\]](#) do you create private stubs , can you pm me your skype ? also do you create/clean shellcodes and process hollows ?

Replying to your PM.

Uefi - May 22, 2017, 3:25 pm

Just got a kernel service request I'm loving how abstract each request is from another, if anyone's interested I'm fully capable of writing drivers.

Stoned AF - May 22, 2017, 5:25 pm

You got experience with C/C++ concurrency programming?

Uefi - May 23, 2017, 8:25 pm

(May 22, 2017 05:25 PM)Stoned AF Wrote: [\[CITE\]](#) You got experience with C/C++ concurrency programming?

I assume you're referring to single processor multithreading, completely capable.

Friedrich Nietzsche - May 27, 2017, 10:05 pm

Low balling will result in you being blocked and ignored, keep this in mind, we are not the type of developers you find on Fiverr.

Uefi - May 31, 2017, 7:31 pm

(May 27, 2017 10:05 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) Low balling will result in you being blocked and ignored, keep this in mind, we are not the type of developers you find on Fiverr.

Agreed. Ready for native work, we're working on another larger project, any smaller projects are currently being denied, please keep this in mind when sending a PM unless you need several small projects.

Friedrich Nietzsche - June 4, 2017, 2:00 am

We are once more taking reFUD requests for NATIVE binaries that are developed in C or C++. PM me for more information.

Uefi - June 7, 2017, 12:09 am

(Jun 4, 2017 02:00 AM)Friedrich Nietzsche Wrote: [\[CITE\]](#) We are once more taking reFUD requests for NATIVE binaries that are developed in C or C++. PM me for more information.

Still offering this, private message either of us for any inquires.

log dot zip - June 8, 2017, 5:08 am

Here's my honest feedback, I went into agreement with this user for a service 5 days ago now. He boldly said he'd easily have it done within the day, that obviously did not happen. He had severe issues getting PayPal integration working, to the point where he copy-pasted and had me test atleast 3 different source codes. What happened next was baffling, he kindly told me he'd get a PayPal account since he felt he needed that, but when he couldn't he wanted access to my PayPal sub-accounts that had my real info linked to them. When I refused to do this, the user passive-aggressively threatened to backdoor my products. Ontop of this he didn't meet the extended deadline of a few days. If you want late deadlines and backdoored code, he's your guy.

Friedrich Nietzsche - June 8, 2017, 5:18 am

(Jun 8, 2017 05:08 AM)Rabite Wrote: [\[CITE\]](#) snip

<https://hackforums.net/showthread.php?tid=5641587>

Please refrain from making false claims. The code delivered was not backdoored. You refused to provide a sandbox API, which greatly complicated the process of testing the code. Copy pasted? Could you deliver some proofs of that before trashing people's threads?

Uefi - June 9, 2017, 5:46 am

Still accepting inquiries, shoot me or Nietzsche a private message if you have any questions and requests.

Uefi - June 10, 2017, 9:53 am

We're not taking refuds until Niche returns, you can inquire just be aware it will be pending until his return.

Friedrich Nietzsche - June 11, 2017, 10:25 pm

I have returned and am taking reFUD requests again, keep in mind that I only take requests for NATIVE binaries developed in C/C++.

Uefi - June 12, 2017, 3:13 pm

(Jun 11, 2017 10:25 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) I have returned and am taking reFUD requests again, keep in mind that I only take requests for NATIVE binaries developed in C/C++.

Welcome back, I've sent you any projects in your area.

Still accepting project inquiries, shoot either of us a PM.

Uefi - June 14, 2017, 8:04 am

More developers, quicker project return time. Shoot me or Friedrich a PM

Uefi - June 15, 2017, 4:51 pm

(Jun 14, 2017 08:04 AM)Uefi Wrote: [\[CITE\]](#) More developers, quicker project return time. Shoot me or Friedrich a PM

Even more developers have been hired for different timezones. Private message project requests. We now support web development and programming in several languages.

Uefi - June 17, 2017, 4:16 am

Thread will be replaced with a new one with the recent coming of time, stop settling for cheap code and have your product done by professionals. I'll be awaiting your requests and inquiries.

Uefi - *June 19, 2017, 9:49 pm*

Weekday requests will receive faster replies to inquiries, private message either of us to get your project quoted.

Uefi - *June 21, 2017, 10:19 am*

We now offer backups at your request, online and accepting inquiries.
