Thread: [\[iRAT\] Undetected Trojan!](#)

MAJORglory - March 5, 2009, 2:04 pm

I was looking for a trojan and i found this i've used this before its great! I did not make this the person who made the video is coincidently has the same name MAJOR. enjoy guys!

CLICK THE VIDEO TO SEE IT BETTER

Video Description

Hello, Hackers and aspiring Hackers ;P! I'm here to show you share to you what I've made. I've been a leecher all my life. So i decided to do things myself. I made a trojan in JAVA and its Fully Undetected by any Antivirus.

Download

<http://#.com/files/205472189...>

Remember! Stay safe! Don't hack other hackers!

Here are some features:

Attention: all are case sensitive!

ss #
getver
update
getlog
getScreen
killt
message (message)
shutdown

You guys are probably asking how you can connect to your victims, one problem is that i have not finished the GUI for the server creation. For now you must tell me your ip so i can compile one for you. When i send you the file, don't click it...don't infect yourself...send it to other people..by the way don't ever upload this file on antivirus sites because it will become detected.

Be sure when you email me with your IP its not dynamic (always changing). So go to <http://www.no-ip.com> to sign up for a domain. That domain should be your DNS. Also download the DNS Updater. Google it or check out <http://www.No-IP.com>

nice video man. :) very usefull

Once Timeless - March 5, 2009, 2:39 pm

Good find it was a good video

System32 - March 5, 2009, 2:42 pm

Cool video, I like it... But can't see that good....

MAJORglory - March 5, 2009, 2:55 pm

FULL SCREEN IT, and HD it

What Rights - March 5, 2009, 3:04 pm

ITS A SICK TROJAN!!! click the vid to go to youtube, and go in the description there is a download link!

It is definitely undetected, scanned with AV nothing!

MAJORglory - March 5, 2009, 3:10 pm

You have to ask him for the server.exe

What Rights - March 5, 2009, 3:16 pm

Is this not your video?

MAJORglory - March 5, 2009, 3:21 pm

LOL no i found it. I know who made it though i have server compiler but i don't have permission

Vlatko - March 5, 2009, 3:27 pm

fix the Download Link

What Rights - March 5, 2009, 3:35 pm

Can we all have the server.exe then?

MAJORglory - March 5, 2009, 3:41 pm

No the server.exe i made for is for myself. Right now he doesn't want it to spread around. So you have to ask him on youtube to make one for you!

What Rights - March 5, 2009, 3:44 pm

this is mental haha, why cant we have the bloody server!

MAJORglory - March 5, 2009, 3:45 pm

it says on the descriptions, and plus my my server is probably outdated.

What Rights - March 5, 2009, 3:47 pm

yeah but im not making an account somewhere to get some ip address, why the hell can he not make one and send it to people.

MAJORglory - March 5, 2009, 3:52 pm

LOL, you're not a hacker you can't even call yourself a skiddie you're worst than that. No-IP.org is a DNS its for those people who has an ip that changes. A DNS basically replaces your ip so when you put it in the server compiler to compile and you give it to someone to infect it connects to you. Its simple

cmartin - March 6, 2009, 2:21 pm

Nice :-D very useful :D

Darkrane - March 6, 2009, 7:42 pm

Does it have RSH?.....

MAJORglory - March 6, 2009, 7:55 pm

It was just posted by the owner, two days ago. Don't come questioning me if you don't want it its fine

moroxbus - March 7, 2009, 10:54 am

please reupload ;)
or send for me PM

Luffy343 - March 9, 2009, 3:54 pm

sweet this vid is awesome thanks

batfink - March 9, 2009, 4:02 pm

This wont be undetectable for long now...

sw0rdy - March 12, 2009, 4:54 pm

java runtime enviroment not found

:(

WhiteHat - March 19, 2009, 3:20 pm

Don't hack other hackers... ha ha ha... priceless... lest we die by the sword, right?

shitsite - March 20, 2009, 3:12 am

You guys are all idiots. Go to SStartup and delete r.jar, and go to C and delete logs, go to WINDOWS, and delete server.exe and end process javaw.exe.

This is infected

kenikfreezer - March 20, 2009, 3:16 am

what make this Trojan.....

shitsite - March 20, 2009, 3:49 am

It's not even his source. SpawnOfSatan found the files, ExiledPanda spread the word that it was infected, after seeing my post, and I think iBruteForce or another HFL33T found the real source.

samy1on1 - March 24, 2009, 6:39 am

thank u about to try

Go ahead. You were warned.

Rexis - March 26, 2009, 1:41 pm

TROJAN !!!!!

If this not your video why you share a fucking trojan with us?

shitsite - March 26, 2009, 10:03 pm

It IS his video.

zerovalue0 - June 8, 2009, 12:46 pm

wow how do u know if he didnt infect you????

N3w_2_H@Ck1n™ - June 9, 2009, 6:44 am

wait is this whole thing infected, or just the ones that he's giving us? like the links? is it a real trojan or not? would be good if it's an actual real one D:

Christos911 - June 29, 2009, 12:46 pm

i will check it tomorrow

Skajper - July 9, 2009, 10:15 am

All of this virus and trojan shit will get patched one day once and for all :)Enjoy all you can 5 years of virusing remaining use them wisely.

snookieface - February 6, 2010, 3:27 pm

I NEED A TROJAN RAT FOR MAC THAT ENABLES ME TO DOWNLOAD FILES, ACCESS ISIGHT WEBCAM REALTIME STREAMING WITHOUT THE WEBCAM LAMP ON, RECORD SOUND AND VIDEO TO HARDDRIVE AND THEN TO DOWNLOAD IT, KEYLOGGER ETC. CAN ANYONE MAKE THIS KIND OF APP ? DOES ANYONE KNOW ANYTHING ABOUT MAC TROJANS ?

I'VE HEARD ABOUT APPLESCRIPT.THT, DOES ANYONE HAVE IT ?

DOES THIS JAVA APP WORK ON MAC OS X 10.6 SNOW LEOPARD ?
