Thread: [Revert l33t username color to yellow](#)

Obli - April 17, 2017, 9:31 pm

Now that Omni reverted the userbars to their past versions (which I fucking love, always hated the green one), I think that it's also time to revert the username color to its original:

(THIS IS A RANDOM SCREENSHOT I GRABBED OFF GOOGLE, NOT MINE, JUST TO SHOWCASE WHAT IT LOOKS LIKE)

Probably already on Omni's list but it doesn't hurt to post about it. Green doesn't fit on the theme either.

You never know, let's hope so.

I wonder if he will also do anything about the theme.

Might as well now since the older userbars were put in place.

That would be dope. Really love the old userbars.. hopefully the purple theme will be brought back?

Cheese Doober - April 17, 2017, 9:46 pm

I love the old userbars aswell. I hope he changes the names to the older color and the theme back to the purple with a modern option you could click :)

Hmm... it would make sense.

Yellow looks so much better than green.

Nice suggestion OP.

Who knows, this might only be a temp thing for the 10th anniversary.

With the current layout current color (green) fits better. Also, no layout suggestions.
