I'm giving away an ebook that describes various human manipulation techniques!

Psychological manipulation is a type of social influence that aims to change the behavior or perception of others through abusive, deceptive, or underhanded tactics. By advancing the interests of the manipulator, often at another's expense, such methods could be considered exploitative, abusive, devious, and deceptive. The process of manipulation involves bringing an unknowing victim under the domination of the manipulator, often using deception, and using the victim to serve their own purposes.

PM me with the title "human manipulation" to receive this book!

Already read this im pretty sure. Any hacking noob should read this. Social Engineering and manipulation plays a stupid big role in hacking. Don't forget Manipulation doesn't have to be chronic lying.
