Thread: [< { Conceal Logger } > WEB-PANEL | PASSWORD | PERSISTENCE | UNICODE | STABLE | AUTOBUY](#)

M00nD3v - April 19, 2017, 7:00 am

THIS PROJECT IS TEMPORARY CLOSED. ALL EXISTING MEMBER CAN ASK FOR SUPPORT WHEN NEEDED.

Welcome to the sales thread for Conceal Logger, one of the best keyloggers ever seen. We ensure that this will work effectively than any other keyloggers you have in past. Major features that have been implemented in Conceal Logger include grabbing passwords from Mozilla Firefox and Thunderbird, Google Chrome, Opera Browser, Internet Explorer, Microsoft Edge, Yandex Browser, FTP Commander, FileZilla, a cookies stealer, a webcam monitoring, a screenshot monitoring, a clean keystroke, a clipboard monitoring, AV / Bot Killers and much much more. Conceal Logger has a very strong persistence features that will prevent termination of the process. Its Unicode Based logger and has ability to monitoring all languages like Russian, Persian, Arabic, Indian etc. Conceal Logger has been coded in VB.NET from 100% scratch and has .NET 2.0 dependencies. We don't use third party applications that steals passwords from browser and email clients because we believed in our custom coded stealer's code and make sure to always to reduce the stub size.

I have to say that its a pretty decent logger. The UI could have been improved in terms of settings and such because most things makes you confused. The stub itself is a little bit too large in my mind but it shouldn't be a problem.

Also regarding the panel setup part, at first I thought it was going to be hard but it seemed like it wasn't after I read your short txt file. Another thing which I noticed was that the serial code you provided me wasn't necessary because it never asked me to activate license which was strange. Perhaps you could fix this to avoid people leaking it to others.

I would give this logger 7/10 mainly because of the UI but in overall it seems like a pretty nice keylogger.

Goodluck with sales bud!

inkbird - April 22, 2017, 12:27 am

It says it has 3 delivery methods. Is that referring to how the logs are sent back to the user or is it referring to how the payload gets sent to the victim?

Also, is the logger FUD or is the use of a Crypter required?

Marwix - April 22, 2017, 1:54 am

Anyway i interesting, sent PM.

Once the server executes on PC then it will give you notification and confirms you that your server has been executed to the targeted PC. Yes you can disable if you want. LL? I don't understand. Will you elaborate more please? However, I will reply all the PM's after few hours. Reason mentioned below.

Sorry to all because you noticed I wasn't online few days ago because I got an accident hit by a car and was on hospital. Just came back yesterday. So be patience, I will reply your PM, Skype or email shortly.

Replied sir!

(May 24, 2017 10:37 PM)holybishop Wrote: [\[CITE\]](#) This looks nice, will like to buy it if I could lay my hands on a good exploit. OP, any possibility of offering this product with a macro exploit?

Just purchased this tool, will give a rating soon after using it.
Hope to see your feedback here soon. :P

Hey man, Now that Netseal is shut down, how do you plan on handling our suscriptions. I need urgent answer as I have waited endlessly for you on skype for support and you are not there.

holybishop - May 30, 2017, 11:16 pm

M8, how do I access the logger? Netseal is no longer active.

Honorable Conceal Logger, we re still waiting for your positive Action towards it.

coocochi - June 13, 2017, 3:37 am

What is going on bro, more than 2 weeks now and no new on how to continue using this program, is this the support we are paying for?

huongviet - July 11, 2017, 3:10 pm

Is this still working? Would love to purchase but skeptical being the thread is kinda.....dead

M00nD3v - July 13, 2017, 6:59 am

Hi there, sorry I was away without letting you know. Its because recently my father expired. I am going back home now from town. Will update here again.

Regards

coocochi - July 18, 2017, 6:01 am

Crappy story really, if true sorry to hear that. But before the expiration what have you done to have people that paid for your program back on track, this is more than 6weeks now and yet no concrete information on what next. Really bad.
