I have recieved a vouch copy from obby and it's truly amazing!
It spams fast as fk and easy to use! I've had a lot of fun with it ?

M O D E R N - April 19, 2017, 9:25 pm

Got a vouch copy, damn this is so fast, A+ for sure! Definitely recommend!

Dubjay - April 19, 2017, 9:27 pm

HMU with a vouch my brother?

Copywriter - April 19, 2017, 9:27 pm

Damn, looks like a damn good program.
I'll take a vouch copy if you deem me worthy. :)

EDIT:

Works like a charm.

?Paddy? - April 19, 2017, 9:28 pm

Can I get a vouch copy?? ////

obby - April 19, 2017, 9:29 pm

Everyone who wants a vouch copy PM me please :)

?Paddy? - April 19, 2017, 9:35 pm

Got a VC, must say works like a charm, fucked with my friends

Friedrich Nietzsche - April 19, 2017, 9:40 pm

I received a vouch copy and it worked perfectly. Literally spammed half a thousand messages in under 10 seconds.

?heshire - April 19, 2017, 9:41 pm

This Spammer is ridiculous. Its amazing how quickly and how efficiently it fills up a discord server

obby - April 19, 2017, 10:11 pm

Pushing a new update to allow for a custom channel input if you don't have invite permissions!

Also: fixed an error with my original update

HeyBuddy - April 20, 2017, 12:18 am

Bump; this is a disgusting bot legit made my dick grow 6" and semi-crashed 2 servers from spam; we tested on martin shrekli's server and holy fuck; it didnt do anything but actual discord devs/employees had to get on and in there own words "We can't fix this"; martin and a bunch of other people ended up going offline due to the massive amounts of spam no one could really post links/talk.

buy this if u like memes

obby - April 20, 2017, 12:22 am

Pushed a tiny update to fix an error..

Gummy Bear - April 20, 2017, 12:49 am

This bot is legit and works flawlessly it's fucking crazy. Sent in a spam request came in instantly and spammed 100's of messages instantly. If you need a Discord Spam bot this is the best and only one I've seen.

obby - April 20, 2017, 1:35 am

Planning adding PM spamming at some point

HeyBuddy - April 20, 2017, 2:14 am

Holy shit just legit crashed a server with this; wish i could rep more.

obby - April 20, 2017, 3:48 am

Seeing how well sales go for the next week and if not atleast paying for the server it's on, it's going down :(

Friedrich Nietzsche - April 20, 2017, 4:05 am

Me and HeyBuddy rekted Martin Shrekli's server, and even discord's dev said they can't fix this.

Lol no you retard; that would affect the consumers; the dev said "we can't fix this"

They resorted to banning acc's in the end; but his bot has hunderds of acc's so it's pretty funny

Discord care about themselves and their community.

If someone report it they will do it.

Went on and purchased the trial for \$5.. I must say, this works great!! Sucks some discord servers will have a bot that protects them from the spam lol... but regardless of that. This works perfect!! Nice work.

Edit: What would make this 10x better is if you were able to spam an individual lol. That would be crazy haha.

Hey guys! I've completed the PM spammer! Unfortunately you have to grab the UID of the user and still provide an invite link. To grab UIDs: Discord -> Settings -> Appearance -> Dev Mode On -> Join server the user is in -> Right click user and select "Copy ID"

This will be their UID

Thanks!

They also have a bot setup to detect my bots and automatically globally ban the accounts, I'm assuming they aren't even automatically getting the accounts, it's something manual so I can't bypass that as long as there is people attacking channels with the bot in it.

I've also disabled VPN usage on my selly, and enabled Paypal fraud detection on it. If you need a way to pay and don't meet that criteria PM me or find another way to contact me.

Ideally: I'd like to work on a voice spammer, for example: user uploads an MP3 then all my bots join the voice channel and play it on repeat but this is a really large task.

I might end up redoing the entire backend so that our accounts are online 24/7 so that when they're told to join a server they're able to stay in the channel for a long time. I also plan to make them on `invisible` status very soon whenever I stop being lazy. I want this project to get much larger than it is now. I just renewed my server it's on so thats another month of this atleast.

Please tell your friends! Every sale counts!

Hey guys! What kind of spammers would you like to see? Other platforms. Even if it's a platform I don't agree with if I get 10 votes for a single platform I'll try my best to make a spammer for it! Let me know!

(Apr 26, 2017 04:58 AM)Justhetip Wrote: [\[CITE\]](#) How exactly do you get the pm spammer to work? Sorry I don't have a guide for it, but basically.

Settings -> Appearance -> Developer Mode [ON]

Right click your target user -> Copy ID

Paste into UID box

You /must/ supply a discord invite link with a server they're on.

tyko - April 26, 2017, 5:53 am

Obby sometimes the spammer doesn't work on certain servers. Like the boys won't join the discord. Or in some discords the bots won't talk but they won't join, and in other discord as they don't type as fast as they do in other servers do you know why that is?

obby - April 26, 2017, 6:04 am

This could be for many reasons, the invite link could be pointing to a channel where you cant type so you need to use the channel parameter. They could have wait 10 minutes before speaking enabled. Alos could be due to how I'm shuffling through accounts and probably a few are rate limited or my IPs are rate limited and etc.

it has nothing to do with html? it has to do with changing my backend to create pms with many UIDs not one and then send messages to all of them not one

I think it's very costly to run this especially since they added captcha codes to make a account now. So the prices I think are fair.

I wouldn't mind helping with that, but my schedule changes from time to time so I wouldn't always be on for live support at the same time. However I am on my computer alot so I wouldn't mind being live support once and awhile. About to head to bed though as my sleeping schedule is normal at the moment.

I started an official Discord Spammer Server (ironic) and if anyone tries to spam the server (you cant) I will revoke you (WITH NO REFUND) even though it didn't do anything.

I'll probably add a bot to attack from discord as well if anyone is interested in that.

Is it by copying the channel id or by supplying the #name?

Thanks.

If you put anything into the channel textbox it will spam into every channel on the server. It used to be one channel only but I decided this was pretty much the same thing. (Literally anything)

added even more randomization and a bunch of timings to try and side step their autoban hope it works :/

Agonises Aka Matheus Boul - May 9, 2017, 2:27 pm

I just purchased this about two hours ago. This is absolutely great for slamming low-popularity discord servers. Here are the pros and cons:

Pros:Spam by over 40 accounts

Quick and efficient

Very easy to use

Option to PM spam instead of spam the discord

Can destroy any small discord channel that doesn't know how to counter raids.

Seriously great for entertainment purposes

ConsA bit too pricey, IMO.

Needs to have invite link - be careful, people can see who invited the bots

EASILY counter-able in large discords who know how to deal with raids.

In my experience, the raid can be stopped within 5 minutes by people who have bots that counter this type of thing.

The accounts aren't verified, so spam can easily be stopped by turning chat on verification-only.

Once all the bots are banned, they're banned for good. This spam is a one-time-only type of deal.

So, is it worth buying?

To screw with people in small discords, absolutely.

To try and raid big discords with experienced owners? Absolutely not.

This was worth it for me, as I just wanted to screw with some old friends who betrayed me. They didn't know how to stop it, and it took them 30 minutes just to turn verification-only on. LOL. So, it's upto you! But I don't regret buying it.

+Rep

Worth mentioning, this just stopped working. I'm not sure if it's down for maintenance, or if the bots have got banned completely from discord.

Also like to mention, you could always just use the invite links from sites that advertise those discords. that way the invite link doesn't come back against you.

"[*]The accounts aren't verified, so spam can easily be stopped by turning chat on verification-only."

Totally incorrect and false.

"[*]Needs to have invite link - be careful, people can see who invited the bots"

This shouldn't be a con as it's out of my control.

"[*]A bit too pricey, IMO."

It's fair if you understand captcha costs.

"[*]Once all the bots are banned, they're banned for good. This spam is a one-time-only type of deal."

This is also, completely false. I replace all of the accounts when they're globally banned or once a day.

"In my experience, the raid can be stopped within 5 minutes by people who have bots that counter this type of thing."

Unfortunately I had to slow it down recently because of autobans but this is true.

I finally decided that I would bring it back today. Then I realized the Discord Developers brought out enforced Phone Number verification, a server owner can FORCE users into having a verified phone number on their account or be unable to interact with the server. ON TOP OF THIS, they've also added a ton of bot flags and will ask you to verify your phone number to even use discord at all, and it's so random I've had it happen on my main account that i've /never/ botted with. I also did some really basic testing and EVERY account I put into my scripts for spamming after a few servers will get flagged for phone number verification and for that reason I'm going to have to close this down. If I had some way of getting around this I would but nothing feasible. Even if I worked on something to try and avoid being detected as a bot, it /will/ eventually flag my accounts and that means they are going to die at a much mcuh faster rate. I'm considering this project done for and I thank everyone for their support while it was up.

If anyone has a good idea for another spammer let me know!
