Thread: [Power outage, router changed my IP, lost all my RAT slaves](#)

DoctorLecter - April 20, 2017, 12:25 pm

So yeah.. the power went out, my router changed my ip, 30 minutes of struggling to open the fucking port again, slaves are gone. What do?

rsx - April 20, 2017, 12:26 pm

That's why you should use a VPN, for security reasons and for this exact reason

Don't think you can get your slaves back

How many did you lose

DoctorLecter - April 20, 2017, 12:48 pm

about 5 ... 1 of them appeared now out of nowhere then 1-2 minutes later i get a message saying "there is a high number of failed connection attempts to nanocore site" .. no other program is using the port

mastermanipulator666 - April 20, 2017, 12:49 pm

>not using a dns server

Hope you get your rat liscence banned and hf account closed for being blackhat

DoctorLecter - April 20, 2017, 12:50 pm

i am using a no-ip dns, and are you a complete idiot for saying that on a website that teaches you how to hack and where are tons of blackhat malware on the marketplace?

Charger - April 20, 2017, 12:51 pm

This is one of the reasons why you need a VPN or server. Additionally, it's not smart to have infected clients connecting to your IP like that. The connection can easily be reversed and traced right back to you with ease.

no-ip is run by feds, holy shit you're a complete idiot. I hope you get raided for being so stupid. I hate blackhats, this forum is not blackhat. This forum is hosted in the USA and the owner is fully cooperating with LE.

And the products sold here are by no mean blackhat, they can be used for bad but so can a knife brought from your local supermarket.

Using no-ip is almost worse tbh

If you are using a DNS then just update the IP to your new one.

You might want to look at Armada's thread on this matter though.

I will find a link. brb

So much wrong here....

Nanocore would have banned your license just for the wording of your post.

No-IP..... LMAO....

Yeah good luck OP ROFL.

izana - April 20, 2017, 3:54 pm

Oh my god you're using your home IP to RAT people? Dude, that power outage did you a favor.

ONURIS - April 20, 2017, 4:45 pm

for that all mates use DNS hosting service
