Thread: [What is the best rat?](#)

moker16 - April 21, 2017, 11:20 am

Hello guys ive got a question

Whats the best rat and crypter to buy at the moment.

Mirakuru - April 21, 2017, 6:30 pm

It depends on what you need..

Paid / Free?

Native or .Net Dependencies?

Do you need fun features?

you can reply here or pm me!

you can use this button for other results.. "best rat"

[Search](#)

see you. ?

CanadianBacon - April 21, 2017, 6:35 pm

This questiion is so generic and has been asked so many times before its ridiculous.
but whatever ill still give you the options i know of

- Best Free rat : None of em (they all shit)..... Best free Crypter : none of em. (theyre all detected)
- Best .Net rat : Orcus (\$40 lifetime)..... Best .net Crypter : DataProtector (\$250 lifetime)
- Best Java rat : SilentBytes (\$13 lifetime) Best Java Crypter : JCrypter (\$75 lifetime)
- Best Native rat : # (\$40/ month)..... Best Native Crypter : DataProtector (\$250 lifetime)

If you have any questions lmk. Again, this is solely based on what ive used / know of.
For all of the rats/crypters listed above you can easily find by quickly searching this forum.

Holy hell, that is expensive.....

Janus-P - April 21, 2017, 10:39 pm

the best rat ? maybe darkcomet v2.2 or prorat1.9 lol ????

Armada - April 21, 2017, 10:47 pm

17 days and already shit posting crappy suggestions.

Good luck with all of that.

Good luck with all of that.

it's a flash of humor Detender you he has a good information In previous posts
The only advice I can give dont buy luminosity.

trashposter - April 22, 2017, 1:12 am

best native rat spy net 2.6 or bifrost xD, as canadian said you can try # for 1 month (y)
