How can I get a positive reputation score to post in the Marketplace. I don't want to post any threads just reply on ones already created, that or pm ... But it seems I can't do either.

just a warning to any of you thinking of +repping OP to help him out: this kind of thread is a common way for users to get some +rep in a subtle way. any of you that +rep him to help him will get a -4 from me.
